

ELLIOTT HOME SERVICES

STANDARD
(Included in price)
Our standard mitigation systems are typically installed using the 3" PVC pipe, stark white color that we keep in stock. The fans are also ordered to match the pipe to keep colors constant. Default selection.

GUTTER PIPE
(+\$50.00)
The mitigation system can be installed using a white or color-matched gutter pipe as opposed to PVC. This will need to be decided on and ordered in advance.

COSMETIC COVER
(+ \$150.00)
A cosmetic fan connection cover can be installed to cover the piping exiting the home, the fan, and all electrical that would normally be visible. This will need to be decided on and ordered in advance.

COLOR MATCHED PAINT
(+ \$50.00)
We can paint the cosmetic cover to closely match the siding if desired.

MUFFLER (+\$40.00)
Mufflers are most appropriate for systems requiring a higher-powered fan that are slightly louder or if the placement option was limited to an area where one would be desired. (PVC Only).

All cosmetic selections should be communicated when scheduling your installation.
Cosmetic options are not needed if the planned installation is internal.
