

Energy Innovation AND Carbon Dividend Act

THE BIPARTISAN CLIMATE SOLUTION

H.R. 763

This bill will drive down America's carbon pollution and bring climate change under control. It is:

EFFECTIVE

GOOD FOR PEOPLE

GOOD FOR THE ECONOMY

REVENUE NEUTRAL

Republicans and Democrats agree

Charge a fee on fossil fuels at the source (mine, refinery, or first pipeline)

Return 100% of net revenue to households as a dividend

This benefits people, the economy, and the environment

FAMILIES GET PAID

TODAY

\$0 paid to households in carbon dividends

THE FUTURE

\$4,410

annual dividend for a family of 4 in year 10

80%

of middle and low income households will get a boost or essentially break even

The money goes back to households as a monthly carbon dividend.

You choose how to spend it.

Which means...

2.1 million LOCAL JOBS across America

With this policy, most people receive more in carbon dividends than they pay in increased costs for fuel or other products. They will have more money in their wallets to spend in their communities, generating new jobs.

Meanwhile, energy companies and leading industries are motivated to pollute less and save money.

Which means...

JOBS ARE CREATED

TODAY

\$240 billion in annual costs from environmental and health harms of fossil fuels

THE FUTURE

2.1 million jobs created over 10 years in local communities

A HEALTHIER ENVIRONMENT

TODAY

114,000 lives lost each year due to air pollution

THE FUTURE

295,000 lives saved through 2030 because of better air quality

less carbon emissions over the next 12 years

A carbon fee and dividend will create cleaner air and a stable climate for you and your family.
