# A751LC Vertical Case Transport System

An off-line platform for labeling & coding on folded cases

- Vertical feeding and transport
  - Large hopper capacity
  - Ergonomic comfort
  - Processing two sides of the case in one pass
  - Continuous operation – no need to stop process for material loading and unloading
- Modular design
  - Flexibility
  - Easy for customization
- Stainless steel and aluminum structure
  - Easy to clean
  - Robust
- Integrated control with process components

drawn with optional print and apply applicator

A751LC is a transport platform designed for offline processing of large flat cartons for labeling and inkjet printing. Vertical operation offers the benefits of large capacity supply, labeling and coding on both sides of the flat cartons in the same pass. Inspection system can be added for data verification with optional rejection mechanism.
