ABOUT COMPANY

Founded in 2022, GITE Industries is a leading manufacturer of wheels and castors for a wide range of applications. Our product range includes industrial polyurethane wheels, Nylon, rubber, and metal wheels. Light, Medium & Heavy duty castors. Custom wheels for challenging applications. We are also an authorized distributor of the Imported Italian brand Tellure Rota Castors in India. We pride ourselves on our state-of-the-art manufacturing facility and a team of highly qualified staff and engineers. We are committed to delivering quality products & great experiences to our customers and strive to exceed their expectations in every way.

ABOUT US

The Team has the deep product knowledge, industry, application, and best practices. They have also built strong relationships with suppliers and other industry leaders, allowing them to offer their customers the best WHEELS & CASTORS.

Their experience and expertise in the wheels and castors industry have helped them to build GITE Industries, which delivers high-quality products and outstanding customer experience. They have a strong commitment to innovation and continuous research and develop new products to meet the ever-evolving needs of their customers.

We are a TEAM of dedicated and knowledgeable professionals in the field of wheels and castors industry, which is reflected in the high-quality products and services we offer

WHAT WE OFFER?

1. High-quality WHEELS & CASTORS
2. Expertise in Polyurethane Applications
3. Customization & Strong partnership for mutual benefits
4. Technical Support for your material handling needs
5. Quick and Efficient Delivery

Thank you, and we look forward to working with you.

THE COMPANY

Tellure Rôta, more than 60 years of guaranteed Made in Italy quality

The wheels and brackets are manufactured in three plants in Formigine, on a covered surface of 15,000 square metres.

Here, the skills of our people combine with technology to manufacture products which are built following certificated standards, which guarantee quality.

The steel sheets are moulded with automatic presses rated up to 630 Tonnes and pitch moulds. Strict and continuous checks made on the steel sheet and on the moulded components guarantee precise processing tolerances.

The preparation of hubs for coating and casting polyurethane wheels and rollers takes place according to in-house created formulas and by using high quality raw materials. The entire process is strictly controlled to obtain the highest performance of the Tellure Rôta polyurethanes.

The thermoplastic wheels are moulded in a specific plant with state-of-the-art presses, in a controlled environment and starting from certified materials. The process ends with the assembly of the wheels and brackets on automatic lines that guarantee high production volumes and constant high quality.

OVERVIEWS

THE COMPANY

Tellure Rôta production process is based on lean production principles, which allows a flexible response to customer requests, ensuring reliable service and rapid delivery.

Established in Italy, competitive in the world

Thanks to the commitment to product quality and innovative solutions to the different movement and handling requirements, Tellure Rôta is internationally recognised as one of the most important industrial companies in the sector.

Tellure Rôta do Brasil was set-up in 2000 to strengthen the presence in South America.

CERTIFICATIONS

ISO 9001:2015 certification, that guarantee management of all company processes even more focused on complete and constant customer satisfaction;

ISO 14001:2015 environmental certification, demonstrating Tellure Rôta's ability to combine management which focuses on continuous improvement and customer satisfaction with environmental protection and prevention of pollution;

ISO 45001:2018 health and safety certification, thanks to the implementation of an internal system which guarantees regulations are respected, constant checks are performed and proactive management is done on all risks which can be found in the workplace.

An in-house laboratory for continuous innovation

In order to guarantee to its customers excellence in designing projects, Tellure Rôta has chosen to qualify and support its production departments with the Test & Research lab, a research laboratory with operational autonomy and accredited since 2011.

Since the laboratory belongs to a network of excellence, it is constantly updated and can expand its know-how to guarantee customers with on-going innovative projects.

EQUIPMENT

The supplied equipment consists of machinery and modern and updated technologies; it is divided into:

- test machines and benches for finished products according to the Standards of reference
- measuring instruments for the dimensional control and the physical-mechanical-electrical characterisation of the materials
- FEM design and analysis software workstations

All equipment is integrated with sensors and software for the collection and processing of data and the tests are video-recorded in real time.
