

AEROSPACE-TRAINING-NEW OPPORTUNITIES

Your World changes when you achieve professional goals. As you explore new perspectives and master new competencies, your confidence builds. Your network expands and your earning potential increases. When new opportunities arise, you're ready for them.

Get the right training: choose specific topics for your employee or yourself.

Take it back and apply it: Industry–expert instructions translating theory into practical application, so you can return to work and solve real-world problems immediately.

Reach your goals faster: Aerospace classes range from 1-10 days in length and are offered at your timetable. The lectures are offered on-site in USA or abroad at industry designated locations. Classes will finish with a certificate of training accomplishment.

One week long classes (typical): the training can consist of the following topics & Capstone project, from this course catalog:

- Where Aerospace is going
- Aerospace and Technology
- Aerospace Manufacturing
- Manufacturing Product Line: Global Landscape
- Aerospace Product Development and Strategic Market Decisions
- Aerospace Engineering: Propulsion, Systems, Structures, Air Traffic Control, Maintenance
- Aerospace Finance: Lease vs. Buy
- Value Management: Major OEMs
- Performance and Technology
- Fleet Planning
- Revenue Management
- Marketing and Airline Models
- Soft Skills, Aerospace Management
- Aerospace Strategy

What you will learn: the program enhances student's use of aviation analytical and communication skills to obtain an understanding of general aerospace principles, operations, laws and regulations.

Class size: 25-40 students

Fee: negotiable market price for 1 week class of \$40,000 plus teachers' travel & accommodations
