- Currently **University College London, School of Management**
PhD Student, Department for Strategy and Entrepreneurship, 2018-current.
(Transferred from Rotterdam School of Management after the first PhD year)
- **Dissertation:** Thinking Strategically about Network Effects
 - **Job Market Paper:** Network Effects by Choice: Evidence from the Board Games Industry
 - **Supervisors:** Joost Rietveld, Bart Vanneste
- 2018 **Erasmus University, Rotterdam School of Management**
PhD Candidate, Department for Strategy and Entrepreneurship, 2017-2018
- 2017 **Erasmus University, Rotterdam School of Management**
Master of Science (MSc.), Strategic Management
- 2016 **Friedrich Alexander University of Erlangen and Nuremberg**
Bachelor of Arts (BA.), International Business Studies

Research Interest

I am interested in how and to what extent firms can induce and modify network effects as a direct consequence of their strategic choices. I seek to answer questions such as:

- How can firms design for network effects by enabling social interactions amongst consumers? How can firms ensure that network effects do materialize? When does it hurt firm performance (trying) to induce network effects?

Publications

Rietveld, J; **Ploog, JN**. (2022). On Top of the Game? The Double-Edged Sword of Incorporating Social Features into Freemium Products. *Strategic Management Journal*, 43(6), 1182-1207. [Video Abstract](#)
