INTERNATIONAL SYMPOSIUM
MIAMI 2026

Where We Started: The Foundation of Integration

Our journey began with a simple but vital goal: Making data accessible and useful.

- **Breaking Silos**: We focused on the task of migrating and transforming CAD, GIS, and BIM data so departments could speak the same language.
- **Data Quality and Standardization**: We built the tools to ensure data quality and compliance with aviation standards like AIXM right from the start.

Where We Are: The Pulse of Modern Operations

Data has moved from being static to being the heartbeat of the airport

- **Unified data streams** - integrate CAD, BIM, GIS, sensor, flight, and operational data into one consistent view.
- **Automate complex workflows** - eliminate manual data tasks with scheduled and event-triggered processes.
- **Enhance passenger experience** - power up-to-date indoor maps and wayfinding for airports and mobile applications.
- **Support digital twin and situational awareness** - synchronize infrastructure, assets, and live data.
- **Real-time operational visibility** - combine live sensor, weather, and system feeds for faster decision-making.

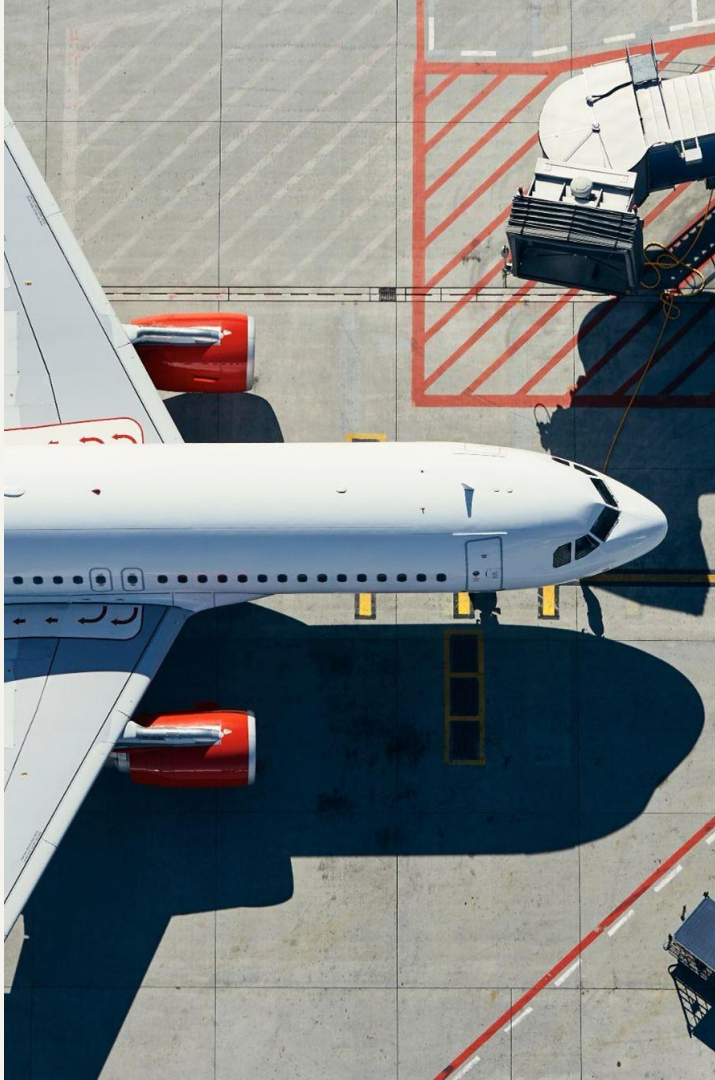
Trusted by 40 of the top 100 Airports in the World

...and many more.

A Data Driven Future

From simple translations to AI-powered analytics, data has always been, and will always be the fuel for everything we do.

- **AI & AR**: Artificial Intelligence and Augmented Reality are new frontiers. Data feeds them.
- **Digital Twins**: The merging of digital and physical worlds that provide increasing levels of situational awareness. Data drives them.
- **Evolutionary Growth**: Technology is changing faster than ever. Our passion is walking the path of data evolution with you. Data is the foundation.



The Best is Yet to Come
The future is as exciting as it is uncertain!
Technology is an evolution, and we are honored to walk that path with you.
