

Ann Marie Holley Special Project

ANN MARIE'S VISION FOR MILITARY CHILDREN

When Ann Marie was a young girl and her father was stationed at Fallon NAS and other naval bases she recalls many hours spent shopping in the commissary while young. When revisiting a place far different than her childhood memories, she sees a need on the base to create a seating area for kids, pets, grandparents, and retirees to sit down in the desert asphalt with the reprieve of some much needed shade. Ann fondly remembers having ice cream while waiting for her family and the three full shopping carts for a month's worth of food for the family, and enjoyed the Navy's strawberry ice cream cones thinking all bases have stuff for kids.

Fallon needs some youth amenities and she'd like to make it a little better place to be at. Also she'd like to work with the Scouts to build pet waste -bird house style receptacles to place at the Posts and other Veterans parks that Veterans with service dogs frequent. Another modern essential!
