TERMS AND CONDITIONS

A 50% deposit is required for the order to be placed and deposits are nonrefundable.

Balance is due upon installation of products. If the balance is not paid within 10 days of installation, a \$25 per day fee will be incurred.

- If the installation is set up in phases, the buyer will pay as each product is installed. Credit cards on file will be charged upon installation unless otherwise agreed upon.
- A 3% convenience fee will be charged for all credit card transactions.
- Warranty comes into effect only after products have been paid for in full. Warranty information will be provided upon installation. All payments to date are nonrefundable.
- The buyer understands that they are purchasing custom products that cannot be canceled or returned once the order has been placed whether in stock or on back order unless otherwise agreed upon.
- Sellers total cost of custom order products will be paid by the buyer in all circumstances. Natural products may have distinct features that are not visible in the fabric sample cuttings; these are inherent and not considered a quality issue.
- Estimated delivery times will be given, but the buyer understands that the seller has no control over shipping of products or parts and cannot guarantee delivery on any specific date.
- The installation will be scheduled only once the shipment has arrived in store or a tracking number has been provided.
- Our installers are trained in how to measure and install each product for the best possible fit in your window and will order products at that size.
- The sheetrock around windows is rarely perfect or square which may cause gaps on the sides of the product or give the appearance that the product is not level, particularly with roller shades. The buyer understands that this is not a quality issue with the seller, but with the home builder and/or contractor.
- Buyers may measure and/or install the product themselves, but they relieve the seller of all liability.
- The seller will replace any faulty products or parts only if covered under warranty, if it arrived from factory damaged or if installer damaged (to be noted on installation sign off).

Warranties

Fading: “Premier Window Coverings” does not warranty any window treatments from fading. When piecing room(s) together, new window treatment may appear darker than an older window treatment.

Fabric Backlighting: Fabrics may change in appearance when sunlight is directed from the back side of the fabric. We recommend you place the fabric sample in the same light as your final application to determine true appearance.

Final Design/Application: “Premier Window Coverings” will not be responsible for the cost of a new window treatment and/or fabric, or other collateral expenses, should the customer not be

satisfied with their window treatments and/or fabric selection due to appearance of the final design and/or other variations beyond Premier Window Coverings control.

Roller Shades: Please be advised as to the following regarding roller shades:

- Roller shades over 96” in width may exhibit certain aesthetic characteristics such as waves, V’s, and/or wrinkling on the tube, which may permanently damage the fabric panel.
- All window treatments installed as “Inside Mount (IM)” will receive a deduction of the width per manufacturer specifications.
- Railroaded fabrics may curl along the edge of the shade.
- Fabrics containing fiberglass may be susceptible to edge fray, typically more visible on dark-colored fabrics.
- Blackout roller shades are not guaranteed to provide 100% darkness.

Motorization: Premier Window Coverings does not warranty electric motors or components beyond the original manufacturer’s warranties. Third-party vendors supply all electric motors and electric components:

- **Somfy** <https://www.somfysystems.com/warranty> – Somfy warrants its motors to be free from defects in material and workmanship under normal and proper use for five (5) years, starting from the date stamped on the motor. Drapery motors, mechanical, electrical, and electronic accessories (excluding batteries) are warranted for five (5) years from the date of invoice. Purchasers should refer to the manufacturer’s warranty for specific terms.
- **Vertilux** <https://partner.vertilux.com/en/certificates/vertilux-5-years-warranty> -The Vertilux 5 Years Warranty protects Vertilux products for 5 years from the date of invoice, when they conform to Vertilux specifications and are properly installed, in accordance with intended guidelines and in conjunction with the proper components.

Custom Wiring: Premier Window Coverings provides original purchasers with written pre-wiring guidelines for use by third-party electrical contractors. These guidelines are prepared by the manufacturers of the motorized units, not Premier Window Coverings, and Premier Window Coverings recommends that the guidelines be verified by the licensed electrical contractor selected and paid for by the Purchaser. Premier Window Coverings is not responsible for errors in the pre-wiring guidelines and/or errors performed by the purchaser’s electrical contractor, including the positioning of the junction boxes or connections to the motor that may cause damage to the home or motors.

GENERAL WARRANTY POLICIES

Warranty

HOME DECOR offers the best warranty in the industry. It is up to you, as our customer, to make sure the consumer has a full explanation of how to properly care for and operate our products. See the following warranty pages for more information for you and your customer.

Wear and Tear

All fibers deteriorate from sun exposure. Cords eventually wear out and plastic tends to yellow and crack when left in direct sunlight for extended periods. These are all things we consider

normal wear and tear and are described in the following warranty pages. Wear and tear items are not covered under the warranty coverage.

Warranty Waiver

There are times when the consumer will insist on ordering a product different from the manufacturer's recommendations, and HOME DECOR will try to accommodate such requests when possible. All blinds that exceeded recommended size limitations will have no warranty coverage. In such cases, you will be required to sign a warranty waiver stating that they understand the blind will be manufactured outside factory recommendations or used in a manner other than intended and therefore will not be covered under warranty. This warranty waiver will be noted on your invoice and sent to you via your preferred method of confirmation. Refer to the forms at the end of this document.

Guarantee

If there is a repair or manufacturer issue it will be processed using a Service Request Form. You can request the latest version from HOME DECOR or find it on our website. Once YOU HAVE INSPECTED THE PRODUCT AND HAVE DETERMINED THAT IT IS A WARRANTY ISSUE complete the Service Request Form. Fax or email the request form to us at 520-595-0552 or premier.pwc@gmail.com

Service Call

A Premier Window Coverings Service Technician or Customer Service staff will be available to answer questions by phone, fax, or in person. If HOME DECOR determines there is a manufacturing defect, there is no charge for a service call for the first 90 days.

If it is past 90 days, it is your responsibility to bring us the blinds or shades in order to determine if HOME DECOR is able to provide service. Any costs associated with repair, parts or replacement will be charged to you. If HOME DECOR determines that the problem requires a technician to be sent out (i.e., improper installation or customer error), or past 90 days since installation, you will be charged a trip charge of \$75.00 (net) plus the cost of repair and parts. We require you to inspect the product first.

Repairs

HOME DECOR understands that issues occur that are not related to warranty. Therefore, if HOME DECOR sends a technician to provide service for non-warranty issues, you will incur a trip charge of \$75.00 in addition to repair and supply costs. The pricing for the most common repair requests are in the Repair Costs section on page PW-16.

Light Control

Inside mount, horizontal blinds, roller shades, roman shades, and cellular shades in the fully closed position will let light in on the sides (light bleed). Inside mount vertical blinds in the fully closed position will also have light bleed on the sides and on the bottom. Outside mount blinds will have light bleed around the blinds. Slatted blinds or shutters will have light bleed between the slats and/or through the route holes. In addition, due to the nature of horizontal slatted blinds, the slats will close tighter at the top than the bottom. This will be most noticeable in longer blinds and heavier Engineered Wood Blinds.

Blinds ordered as multiple blinds on a single headrail will have a ¼" gap between the blinds. Deflection Slight Deflection may occur in Vertical Vanes when exposed to direct sunlight. This is a normal reaction of an extruded plastic subject to UV ray variances. Once direct sunlight

recedes, vanes will return to original specifications. Vertical Vanes are not guaranteed against warping when installed in a window subject to intense, direct sunlight.

Dye Lot Variations

Dye lots may differ from one run to another. Therefore, if color consistency is critical, please note on your order form that the blinds will be in the same room. This will ensure that all blinds manufactured for those windows will be assembled from materials that are within the same dye lot batch.

Because our wood blinds and shutters are made from real wood, there will be variations in color, stain, and grain. These are characteristics of real wood and are considered acceptable quality. Additionally, certain stains will absorb very differently with wood. Red stains like Cherrywood and Mahogany tend to be inconsistent. This is an inherent feature of the interaction between the stain and the wood and is not seen as a defect and not covered under the warranty.

What the Warranty Does Not Cover

This warranty does not cover conditions or damages caused by abuse, accidents, alterations, misuse or from measurement, installation, use, cleaning or maintenance. Normal wear and tear including (but not limited to) the items below.

- Extended periods in sunlight, plastics tend to yellow or crack and all fabrics, man-made and natural can lose original intensity after extended exposure to the sun.
- It is naturally expected to have some loss of color intensity as well as discoloration may occur in engineered or basswood slats when exposed to sunlight over extended periods of time.
- Colors may vary from lot to lot and may not exactly match previous purchases.
- All cords, fibers and fabrics may eventually wear out. HOME DECOR considers these items natural occurrences and normal wear and tear components, and they are not covered by this warranty.

THIS WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WRITTEN OR ORAL WARRANTIES OR OBLIGATIONS AND LIABILITIES.

**RESIDENTIAL LIMITED LIFETIME WARRANTY FOR

CARE & CLEANING INSTRUCTIONS

Cleaning Methods

Dusting. Regular dusting with a feather duster will maintain a “like-new” appearance of HOME DECOR blinds, shades and verticals. Using a hair dryer (non-heat setting), canned, or compressed air can also be used to blow off loose dust particles.

Vacuuming. For a deeper cleaning, vacuum gently with brush attachment of any standard vacuum cleaner.

Professional Cleaning. You may choose to have your entire blind cleaned periodically using a commercial ultrasonic blind cleaning service. This option would be used to clean away years of exposure to smoke, outside aromas, or heavy dust buildup.

Blind Specific Cleaning Methods

Engineered Wood Blinds. Use a soft cloth with a mild detergent that has been dissolved in water. Make sure the cloth is damp, not wet, when cleaning slats.

Basswood Blinds. Use a soft cloth with lemon oil or wood preservative to clean. **Water is NOT recommended due to potential surface damage.**

Vertical Blinds. Use a soft cloth moistened with water and a mild detergent on all slats and vanes. Applying a very thin coat of detergent (dissolved in water) to slats and vanes will reduce static build.

Aluminum Horizontal Blinds. Use lukewarm water and mild detergent with a soft cloth. Over-the-counter blind cleaner products are also available.

Cellular Shades. The strong, anti-static fabric repels dust and dirt. Consequently, they require little cleaning and maintenance. Regular dusting with a feather duster is all that is necessary in most circumstances. For a more thorough cleaning, the fabric can be lightly vacuumed with a brush attachment, or you can even blow off dust with a can of compressed air.
