More room for living
and entertaining

Zipscreen® shades provide privacy
and protection from the sun, wind, rain
and insects. Relax, entertain, and dine
outdoors.

Create an outdoor oasis and expand
your living space without the time,
stress, and cost of traditional renovations.

AUTOMATE®
SMARTER SHADES

Push Series Remote

Explore the versatility of our Push Remote control
range, designed to suit every home. The Push
ONE remote is ideal for controlling a single shade
or grouped shades within a room.

For multi-room management, the Push 5 and
Push 15 remotes offer precise control of multiple
shades or groups, making them ideal for both
interior and outdoor Automate-driven shades in
homes of any size.

The premium Push PRO is our first in-house
designed smart remote, featuring timer
functionality for autonomous shade operation
and the ability to customize shade and group
names for up to 30 shades.

The Zipscreen® Difference

The Zipscreen system is designed and developed by Rollease Acmeda and features the latest in technological innovations with over 30 years of research, design and performance testing.

Sleek, secure, and durable, your custom designed system can be made in widths up to 23 feet and drops to 16 feet to fit almost any area.

Custom Headbox Configuration

Zipscreen's headboxes are manufactured from high-quality aluminum featuring a square, modern profile. From the sleek and compact Box 120 to the adaptable Box 160 and the robust Box 190, each option is engineered for consistent aesthetics and seamless integration.

Hidden Fabric Retention

Concealed within the side channels, z-LOCK™ securely holds the fabric in position, creating a smooth, frictionless path for the shade. The zip-guided technology ensures zero gaps between the fabric and the side channels for a perfect seal on all sides.

Solar Screen Protection

Defy the elements with solar screen fabric made for the outdoors. Pair your Zipscreen system with Rollease Acmeda's durable Textstyle X-Weave fabric to protect against harsh sunlight, rain, and insects while preserving the view. X-Weave is available in 5% and 10% openness, in a range of 11 colors.

One Action Ultra-Lock

Exclusive to the Zipscreen system, the patented Ultra-Lock hidden locking mechanism integrates into the side channels. Durable, reliable and completely unobtrusive, Ultra-Lock secures and tensions the shade for a smooth, taut fabric finish.

Zipscreen® Control Options

"Hey Siri...
open my shades"

Manual

Control your Zipscreen system manually using a cost-effective crank solution. Simply open or close your shade by winding the detachable crank handle.

Motorized

Operate your Zipscreen shades using the premium Automate™ FT Motor. Enjoy effortless and convenient control with the simple touch of a button or the sound of your voice.

Home Automation
Integration

Automate® Pulse 2

Designed in California and made to be seen, the second generation of the Pulse hub allows for further customization with the introduction of additional room, scene, and timer icons.

The new hub boasts native sunset and sunrise technology. Shades will raise or lower based on location to allow precise and automatic shade control.

With built-in Wi-Fi or the option of a LAN connection, the Pulse 2 quickly connects to the home's network to unlock the luxury of automated shade control.

Automate Pulse 2 offers more integrations than ever before. Experience voice-activated shade control via Google Assistant, Amazon Alexa and now Apple HomeKit with Siri.

ARC

ARC® (Automate Radio Communication) is Rollease Acmeda's proprietary, bi-directional communication technology that brings the Automate motorized shade systems together.

ARC communicates the status of shades position and battery health straight to the Automate Pulse 2 App.

Zipscreen

The ultimate exterior shading solution for any outdoor area or window. Designed for alfresco-entertaining areas such as pergolas, verandas, and balconies, Zipscreen offers privacy and protection from the sun, wind, rain, and insects.
