

As promised; The Truth that is Revelations.

By David Charles DeWitt

In the beginning as written by Moses, whose real identity was hidden even to this day, came to be born in a place ruled by a pharaoh who believed those born with disabilities should be destroyed like what some animals do to the newborns which explains the animal heads drawn on human bodies. There were no slaves as new evidence shows which now leaves to question what happened to Moses, but I'm getting ahead of what I am trying to reveal.

The truth behind the seven days of creation follows this line of thinking:

The 1st day; let there be light. This gland has to do with the ability to see images with eyes closed as well as being responsible for remembering dreams. It is known as the third eye located above and between the eyes and doctors do not see any use of this gland.

The 2nd day; A firmament in the mist of the waters. Separating the waters from the waters is also keeping one spirit out of the body of another. When this gland becomes weak a person will see beyond the wall of flesh and in most cases will be considered to be mentally unstable. Of course there are usually spirits around us, mostly those who know us and have passed on, but doing someone wrong will also cause them to be near.

The 3rd day. This is where people were adjusted for life on earth. Earth had mean certain specifications beyond what existence had already been. It is noted that the 'waters' had gathered 'under heaven' in one place. The main explanation for the 3rd day is 'trees bearing fruit in which is their seed, each according to its kind. Doctors have revealed the throat gland has a lot to do with a parent passing its genes to its offspring. What should be notes here is original transcripts were slightly altered when translated to try to make sense of what was written in the case of the King James version, which is only what they could imagine at the time.

The 4th day. Let there be firmaments of the heavens. This is something no one can get but has everything to do with Jacob and has 12 sons, or in reality the astrology signs. Reading about the 12 sons and reading about the 12 meaning of the signs should open a door those who have the ability to understand and not the ability to guess. And it is important to understand the greater light and the lesser light which seems to indicate the range of compassion of which compassion is very difficult to teach therefore life is the process of growth within to penetrate that which is without.

The 5th day. Let the 'waters' bring forth swarms of living creatures. The fifth endocrine gland has been called the solar plexus and has the ability to feel when danger is near caused by either animals or man. It also has an ability to sense people around and uses the cross-arm technique to filter the general atmosphere.

The 6th day. Let the earth bring forth living creatures according to their kinds. The animal world has familiarities with humans in the respects of offspring and survival but is limited even though there are animals that can show a almost human type of thinking.

The 7th day. On the seventh day God rested. The seventh gland is of course the reproduction gland. The message here is sex must only be used for procreation and not recreation. It is easy to get lost in feelings especially if we don't understand the meaning and why they effect all us.

On to Adam and Eve;

They are a big part of the first book of Genesis mainly as already mentioned, being the first to be given the seven glands or Chakras as they are called in the eastern philosophy. How do I know this? It was Moses who wrote Genesis and this is something I did not need to be taught or informed by anyone. It is simply things I understand.

Now whether or not anyone agrees, it is clear to see why God commanded Eve not to eat fruit from the apple tree. The snake represents the kundalini and the kundalini can enhance the glands for good of the 6 upper ones to bad of the 7th. That is the same force that is beginning part of the child birth process also responsible for physical internal combustion, I know this from personal experience. The reason why they were removed from Eden because of the waters mentioned as many drifting as it were. Here we begin to see God's plan which is referred to as ' In the image and likeness ' or in truth, the understanding and compassion of God that can dwell in everyone. What some don't get is that part of God can either grow or be cast out by each one's action and the Bible speaks of what happens to those, and the main lesson here is given by Cain and Able that sets the principal.

There are certain things that should be pointed out such as;

7 churches, 7 headed beast, which is talking about those before they stood up for God's truth, 7 Kings of which 2 are not which indicates the 5 as Jesus, Muhammad, Kirshna, Buddha, and Confucius, and the other two are David of the 6th church and Moses of the 7th reborn into the present world or the First and Last.

The 7 churches are not accurately described because Revelations was written in the time of Jesus and John who were guided by God himself as to what to record so the churches

that are spoken of that eat food sacrificed to idols are not defined by name but those churches are still identified in this way.

The Old Testament was God's words mostly about the of end of days as it were and Jesus unlocked much of it but Daniel defined when the end of days were near so Jesus may not have had the information of didn't understand it. Even more so the city of Babylon is really the city of Manhattan described as the attack of 9-11, and the reporter who said the city was split into 3, as well as the man on camera covered in dirt, and being a trading center with a seaport should have at least made some news but not even a little bit.

The 6 seals written of are in fact the 5 who are and Moses. David is the one who returned and is infact Moses incarnate, that is why Revelations says I am the 1st and the last and the 4 horsemen are the 5 less Jesus with identifying personal tags.

Finally the song of Moses I have written and recorded even though there are those who have done this before EXCEPT my version is about the life of Moses as I have come to see the relation of what happened to him and what has happened in my life like being threaten by an army and not being drafted for the war which both were due to my disabilities. Why am I writing this? Because it was written and history does repeat itself more accurately than any can imagine.

Now for a perspective of what I have experienced.

At 5 years old my parents had taken me to a new church that was built near by. My father had problems when he was young with a sister who was being bothered by a pastor leaving notes in a bible for her, but for my sake he and my mother thought to give me a chance to see if I would like it there and put me in a class for children. I sat down at a desk where a children's color book of Jesus was lying. I opened the book and came upon a picture of Jesus with animals and a child sitting near him. As he was looking at the child he suddenly turned his head to look at me and he smiled. I wasn't afraid but I got up and walked out of the class very much confused. The teacher stopped me and asked why I left and I told her what I had seen so she called my parents thinking something was wrong with me and I never went back. I had only went to a few churches in my entire life but never to join.

One other school incident involved two guys who didn't like me for no reason I could tell.

One day while in the library they wrote a nasty note to a girl and signed my name. My parents were called in and the principle refused to even think I didn't do it but my folks knew better. I was expelled for two days but was called to do what I wanted so I bought a ic cream and walked by the school waving at the two who got me into it. It wasn't till I realized Moses had the same happen to him and though a few parts say he left because of fear, he left with people who would have been killed for their physical disabilities allowed by the

pharaoh. One of the few churches I attended the pastor wondered why Moses was allowed to kill but in one of the Kings writings it was said two men seem to be arguing and Moses approached and when he did one said 'Are you going to kill me too?'. It was these two who lied about Moses burying a soldier in the desert knowing if anyone looked they wouldn't find anything.

For much of my life I had always felt like I was pushed into darkness and like a lamb couldn't break from it only because I didn't realize then what I have come to understand now. Some years later I was taken to park swimming pools but would refuse if my swim trunks didn't cover a little below my knees. I had calcium deposits from a grandfather that was a logger that had a bad accident. For me it felt very fearful to let anyone see me though some of my deformities were unnoticeable. I wouldn't understand why until I learned more about Moses and Revelations. Popular belief states Moses killed a guard because of a slave but the truth is Moses was accused by two men who thought it was funny. There were no slaves but there was a law that anyone with deformities was put to death. This explained why Moses was sent to a princess because his deformities weren't noticeable and eventually would cause him to guide others like him from the pharaoh with his permission. There was also something extremely secret about Moses that no one even realizes to this day, except for myself.

When I was 16 or so my left leg locked up when I sat down because of bone deposits. I sent the night to have surgery in the morning and my roomy was none other than Don Garlits the funny car driver. Since I didn't know much about drag cars so we had little to say to each other. When I was put into surgery I remember going to sleep and the next thing I know I'm in the same room and going to sleep again. The first time was 7 hours but in ICU after wards my dad looked in and uncover the blanket covering my leg. I was bleeding to death and he discovered it. The second time I was in for 24 hours because he cut the bone that caused my leg to lock but left a sharp edge that cut my main artery and use a tube to repair it. Two weeks in ICU with only watching then change saline bottles. I was told by the doctor I wouldn't be able to use my leg but it healed and for 60 years it has been alright. In case anyone is interested, Rev. 13:3 speaks of a beast with a mortal wound that was healed, I had thought it meant Jesus but he wasn't healed. 'Beast' refers to people who are yet to act in true righteousness by living in the fullness of the Ten Commandments such as not killing even animals.

From this point a few amazing things took place and one involved a friend. At that time we both played guitar and met a drummer who was into drugs as his father was to some small point. The first time we were there we had to wait for him so I saw a couch and went to sit down. The moment I hit the cushion I had a very strong feeling I was sitting down again and

then again and that feeling continued for several times and became weaker each time until it felt more like being drawn inside as things visually got darker and moving in a direction to the down and the left until I couldn't tell it was there anymore. We didn't do drugs at that time as we hardly knew of any. I thought it may have been a point where I had been in a past life of a existence of a world that was a repeat of this one and when I was reading Revelations for the first time in verse 21;1 it revealed there was a new heave and a new earth for the old ones had passed away. It didn't mention how many times but who would even guess it happened once. Needless to say nothing came of the band to be though we did play a while one day with his father on the drums.

There was the time when I was in the Boy scouts and my father was the leader who took the small troop camping in Azusa Canyon as my first camping trip. At night in my sleeping bag I was looking up at the stars and noticed one of them moving. It was too far up to be a plane and not far enough for a satellite but it would be the first in a page that could write a book by itself. As time went on nothing would happen until my Mary just like Jesus had.

One final time I would like to add happened when I had been given a ford falcon by my folks who where such a great blessing even though I didn't realize it that much. There were 4 friends with me as I decided to go up Azusa Canyon and spend some time. On the way back one friend wanted to drive so I allowed it. He started speeding up around a corner and as I told him to pull over something made me grab the wheel at which time the car flipped twice sideways towards a 100 foot cliff. It landed on its wheels with the rearend over the cliff and the three in back were struggling to get out over each other and the driver just sat and staired at the stereo of which I had fixed that day because every little corner it would shut off. We did make it home but the front wheels were bent badly so that closed the chapter of my millennium falcon.

There was another time I will never forget when I was working at a plastics medical tubing manufacturing plant. I was working 12 hours shifts and my legs were bothering me from standing so much. After a while it became hard to hide but I needed the job so I had to endure. One day it was getting to be too much then out of the blue it was if I was overcome with joy. It was a feeling I never felt before or since and I wanted to tell everyone but didn't. It lasted for about 5 minutes then it was gone. However feeling like that would have been the only thing I would ever want the problem was that you wouldn't want to do anything else and I didn't watch the machine like what I was hired to do and it went down as my employment there went with it.

One day I was sitting in a park thinking I would never marry because I wouldn't want anyone to go through what I had but as I was sitting there I felt two men behind me and one of them said "That's what you think ", and then they vanished. I didn't even think about what had

happened or realize what this really meant and I didn't know the term Spirit or any thought about after life but what was to come was a very long story no one could make up or believe but it happened.

A good friend of mine with a VW bus that had a wire hanger for a gas pedal because the one on the floor fell out and him shifting was funny to watch, took me to a night club but I really wasn't into places like that still he insisted so for all of the night until the last song I sat and watched people dance but suddenly saw a very beautiful lady sitting with her mother and so I asked her to dance and also got her phone number. Suzan Mary was her name which reminded me of my mother's name that was Mary Jane. This was the beginning that brought me to where I stand today.

I came to find out Suzan was an extremely gifted medium but at the beginning she didn't know that and I didn't realize I had the same ability. That was a good thing but those negative spirits also had what seemed a lot of influence though we would never give in to harmful ways of treating others. When I first met her, she had an interest in a Ouija board and since I had no knowledge about such things I saw no evil there. The first time it felt like she was pulling the pointer very hard but she said the same thing about me. Then a time came when the pointer moved so fast it had to wait for us to see where it was and to both of our surprises it spelled out 'They call me the savior'. And just then I had a very strong feeling the room started to spin and moments later started to rise after a few minutes it felt like I could look out the window and see us above the ground. There was a great feeling of compassion and understanding but we couldn't feel how far that went. There was no question who this was and from that point we would be introduced to Muhammed, Buddha, Krishna (which Suzan was very partial to), and Confucius or better known only as the four horsemen though this wouldn't be revealed to me much later when I was alone and had gained a better understanding of Revelations.

Later Suzan was pulled out of her body so they could speak directly to me and because what was said Suzan didn't know such things. We were warned about many things and one in particular had to do with the Kundalini and how when I felt it to mentally drive it up as far as I could. The time this warning to take effect happened when I decided to join a class in comparative religions which was taught at Jewish center where I also wanted to learn Hebrew. The teacher had studied secret documents in Israel but never said anything about them. So the first class started with about 20 people there and his first question about what the word religion meant brought my hand up to answer and then he pointed to me to answer but as he did I felt like a rod was coming up in the middle of me and realized I had to concentrate to keep it moving up. As it reached the level of my heart it exploded and even with my eyes open it was dark. I started to gain my eyesight back and looked around

thinking there were parts of me on other people around me but to my surprise they only had strange looks at me. In all of this I was back but forgot the question and I don't know how long all of this took but I remembered the question and answered it. He never asked me anything more and I never relayed what had happened but learned from experience what internal combustion really was. I also didn't finish my Hebrew class but did learn that many of the names linked together is a mantra spoken of which there are many in the Bible.

Suzan went to many churches asking the pastors for any information about the Bible but they only answered 'Just believe what it says.' But because of those we met on the invisible side of life, it became clear there was life after death as well as not having to be reborn as Jesus had proven, the very reason for the Ten Commandments which he had followed.

Then came the time Suzan got a job at Shakeys pizza and the employees with their families were offered free lunch on a Sunday. They were trying out chicken so I tried some and without knowing it bit into a part with blood in it. Got home not thinking much suddenly blacked out. 3 days later I woke with a quarter inch of skin peeling off my hands and feet. I was told a spirit named Israel helped me recover and not till later discovered Confucius died from food poisoning. Another seeming coincidence?

Not long after we met a spiritual pastor named Margaret who had the most colorful eyes I had ever seen and I also became interested in the Qabala or Tree of Life as well as the tarot. The tarot I saw as every possible situation any being could go through and if people had a vibration maybe the cards could be drawn by them. I day I learn I was right as Margaret was hold a physic fair for two days and ask me to join. It was easy to see what each card expressed as far as situations went so without any practice and using the QBL as a template I stated my first reading for a young man. The 5 cards in the center referred to the goal, mind, present situation, what was helping and what was passing. The 3 cards on one side presented what was keeping the goal to be reached and the other side what could be done to reach the goal. The young mans mind card showed the Queen of Cups and I told him he wanted to concentrate better and he's expression lit up as he yelled out "that's exactly right!" from that point the next two days were reading after reading. One elderly lady I did one for keep denying everything I was telling her but her family kept telling her what I was saying was the truth. And the end of two days I had a stack of tickets half a inch thick. Also there was a man who could photograph auras and Suzan and I had one done. Hers was full of colors including some white, but mine was solid deep purple with little sparks like fireworks.

Margaret used her house as a church where quite a few met. One man in particular who tried wearing a paper pyramid on his head noticed the bump on the top of my head and said "I know who you are!". I only wish I had known then what I know now but we can't

break the laws of the universe no matter how hard we try, that is considering spirit. As far as Margaret goes she had been a really great help and one night while meeting with Suzan, her brother, and a friend we all sat down to meditate but had no idea why. As I closed my eyes almost instantly I saw I was in a church with a high wooden ceiling and a dove flying down to me from it. The a man with a white robe with holes in his hands stood before us and I looked to the side to see the others next to me. Suddenly I was swept away with him standing before me and looking at me sadly as if it was for my benefit then he pointed to the left and I saw an ancient man with a very long white beard and hair. I came to realize this was Moses and then just as sudden he engulfed me completely and I saw a place with no sun but it was lit and mountains in the distance with a water fall and wheat as well as trees all around. Then I was out of it and staring at Suzan as she was staring at me and asked were I had gone because she had seen us as I had. I told them what had happened but it just isn't the same unless it happens to you.

A day later it seemed that Margaret was upset at me because she wanted me to be part of her church but something inside couldn't allow that. Strangely not long after she sat with me and suddenly someone was talking through her and filled me with words of hope and encouragement.

Some time later I had a dodge station wagon and went to the campground in Azusa as one of our guides said we may see something out of the ordinary. So we pulled off the road where the ranger station was closed for winter and prepared for sleep but I keep looking around expecting to see something as I was told and felt a power presence for a few moments and just after above the trees I saw 3 small disks with one blinking red light on each but Suzan didn't look in time so I grabbed the door because I knew where they were going to land but she put a death grip on me and refused to let me go. A few moments later we were asleep as if we were drugged. The next morning it was like nothing had happened.

Though it didn't seem so long we had an apartment and a road runner and had just gotten a '65 T-Bird. I was watching TV then with eyes open I saw us in the station wagon and I woke to see a being not much taller then the car with what seemed to be glasses on. Then I see myself sitting on a stool in front of a big round screen with 3 square buttons and to my side Suzan lying on a slanted table with many little wires on her head. Wasn't concerned at all and as I looked at the screen and I heard myself say 'I wonder what that is' and I heard a deep voice respond with a many syllable word which there was no way I could repeat then I was back to watching the TV with eyes still open. Thinking this must mean I need to return I told Suzan I was going back up and she told me 3 times not to turn the engine off and our guides made that very clear. It was about 10 pm when I got to the firs campground known as Cold Brook and enter the campground to find a man with a Pinto station wagon with

curtains around and a very loud hum coming from the back and on the picnic table as if on display, his lantern, sleeping bag, cooler and stove in a roll. As I passed by he gave me a nasty look so I decided not to stop but the noise in the back of his car was no generator so I went back to the main road to go farther up behind him and pulled over to get out and cross the road but had totally forgot not to turn the car off which I did but didn't think it would mean anything. Crossing the road to look I still saw only darkness and I wasn't about to get closer walking through bushes so I got back in the car and looked at a higher ridge and saw a bright orange light. I went to investigate but it sounded like there were dozens of rattlers in the way so back to the car I went. The a feeling that I was in danger and it started to grow so I started the car but it wouldn't start. The gauges went nuts and I had just gotten the car that day so I knew it wasn't the car still I leaned on the starter and the feel that something was coming to kill me was very close now. The engine started to crank very slowly until it stopped and I yelled out "God please help" and at that moment without the car cranking even once it was running so I turned back and went past the campground entrance and pulled over with the lights off but the car still running. Trying to catch my breath I noticed car lights coming up the road and the saw a Vega station wagon with curtains pass and notice it 11:05. Soon later another car passed at 5 minutes later and after the next one it was time to go. When I got back I told Suzan what happened and remember what Margaret taught me about hypnotism I tried it on Suzan. She remembered seeing me next to her on the ship but the she froze and took me a while to tell me what had happened. Apparently a female entered where we where and she woke from their control. That was the end of the story for us but I went back up to see where they had landed and found 3 spots that looked like the ground had burned to a black chunk.

I would like to write about all the changes that happened to us time had passed but to finally add so time later and us being in Utah, the Council of Melchizedek who we were being instructed by told her that if I didn't give up God they would make her leave. I gave no answer which was the same as saying I could never give up God no matter what so shortly there after she left after that time with her I was still in Utah alone and met James who would later become James who was James. Then I also met two others namely Pat and Caroline who were homeless so I decided to take them all to California's Azusa Canyon as a retreat of sorts where staying at the Cold Brook Campground one very rain night we had company set up camp. 3 men and us were the only ones there and through I was teaching James, Pat, and Caroline how to do the readings I had figured out, we heard the 3 men singing songs of old. The next morning after the rain had stopped the came over and we

started to discuss religion and it seemed to get off to a bad start until the older man stated we were saying the same thing. He told me they were here because God sent them, they didn't use a map but found their way and when they saw us figured we were the ones they were directed to. He then gave me \$20 which we had no money and the other man said God told him through the smoke. As for the third the others were help him as he was homeless and my gang told him they could help by doing a reading and according to the 3rd man they hit most of what he needed to know. Later we found ourselves going to Maragret and to my surprise she advised all 3 to disband me and Pat and Caroline did but not James. There was a darkness around me but it was trying to destroy me and though I tried to conquer it, it was as if I had no control which later I learned is the same way with a lamb.

James and I returned to Utah where we meant a homeless young man Jamie. One night I decided it would be a good game for a hide and seek so at midnight we went into the park and a police officer noticed us. Jamie and I made it back but the officer caught James hiding in a tree. The officer let him go with a warning and so ends this true story as they all are.

Then came the time of music. I was in Denver and with the help of a very good friend whom we almost had our chance to play at Blackmore's Rainbow but because of my friend waiting but not hearing anything the Dutchmenn never got the chance. But again that would have put me somewhere I couldn't be. I wrote, recorded, arranged, and performed most all song by myself including my CD 'Written in Rock B.C.' and have a lot of songs yet to be release including the song mentioned in Revelations 14:3 that is the new song. I wrote a 3-part song called Written in rock which was as if Moses wrote it about his time and journeys. Still waiting for someone to get it. One of these songs came from of a time when I was in Jersey Shore, Pa. in a campground where a lot of amazing things happened.

It was a time when Suzan passed from this world but I knew she was in spirit so I did everything to find her. Most people would use a medium but I knew better so I listened and heard a voice that if I washed my clothes very early in the morning, I could draw her to me. I went many mornings in a row but nothing of course happen still I felt it was like showing her my love to her for helping me to get where I was, then one night I was directed to a side street where I felt a great presence and I felt her there with me and I could see her too. It wasn't to long later when I went to get money out of my account that was still in Utah the bank refused to pay though the money was there. I was barely getting buy and at that time I had only a gallon or two of water and only enough for one dinner. It was going to take 2 weeks before I could get any money and I never asked for help even from my folks who had already gone far beyond to help me. Even though I was told rent wasn't a problem I was living in a converted step van and had little gas so I parked at a grocery store and walked

around trying to find anything. Then disaster! Jesus came to me and looked very angry at me and then as if I was playing a true to life scrooge I felt as if a heavy chain was in me and every step weakened me so now I couldn't even go any were and on the way back to my van I felt and heard a lot of people behind me laughing at me. I finally got back and had no idea what was going on then I heard a very clear voice telling me not to close my eyes but just then it became impossible not to keep them open then suddenly someone with a white robe was strangling me. I was apart from my body and struggled to get back and for a moment I could feel that I wasn't breathing, even more I saw Suzan locked in what appeared to be a glass box. But who ever this was continued as I tried to push him away THEN he was gone and I felt like I was going somewhere completely as spirit and ended looking at two large flower type plants and a gate in the middle then I found myself inside the gate and it looked like where Adam and Eve lived before they were forced to leave then my eyes opened an I had to take very deep breaths to recover. The next day I received a message from Suzan's mother sending me and a family member as when Suzam we had gone to take care of what she left behind a few weeks before. Since then, Suzan has been with me from time to time watching over the family and friends. I returned to the campground and decided to play my songs as if I was on stage having recorded all the part except lead and vocals, and I made no mistakes s afterward I went outside and saw a UFO cruising a few hundred feet going from east to west and then another closer and hearing a sound like wind one passed over head me at only 20 or 30 feet all within a few minutes after I was done. They let me know they were listening and I felt better then if I would have played before thousands of people.

Fast forward to a time when I had converted a school bus into a home. I had returned to Pennsylvania as I had with my parent to visit relatives and was staying at a campground near Knoebels Park when in the middle of the night I heard a very loud and familiar noise I hadn't heard since Azusa Canyon and as hard as I tried to get up I couldn't. The next day I asked around but no body heard anything and I thought how could anyone miss that as loud as it was. Knowing there were those who were with whom the Bible calls the first race, I could only assume they were calling those on earth back to there ships and the reason should be a no brainer. There were many times I could look up at the sky and be automatically see them crossing the sky and some times they would hide there lights or disappear into the darkness at some point. But at present I haven't noticed them at all, only reports of others seeing them.

Then I thought about how the universe began. No one expects spirits to be alive yet Genesis states the Face of the Deep. Anyone get that? I did and then I took it many steps farther.

Here mathematicians should stop reading....

We understand the basics to some limited point of life and how one cell divides into two and so forth. But let's say that's how the universe began as well. The number structure from 1 to 9 is really all there is no matter how many of those numbers you add together as there is nothing other than 0 and 0 isn't a number but absolute nothing yet it is a need to have. $1+1$ is the same as a cell ready to divide but $2+2$ is something totally different as with the other 7 numbers. A very long time ago when the first personal computer came out I couldn't do much with it if anything, however I thought if all matter was reverted to its single form being the death of the universe like how a black hole breaks down all matter to its finest form, then something may be able to restart the process even if it was a thought from God who would survive even the destruction of the universe itself. So I designed a simple program which started as
