

A detailed view of industrial machinery, likely a power generation facility, featuring complex piping, valves, and metal components. The background is slightly blurred, emphasizing the foreground elements.

J Kolshak Industrial

**Turnkey Maintenance Service
For Power Generation Facilities**

Our experienced multi-disciplined team provide consulting, procurement, construction, and disposal services for power generation with a focus on long term reliability and timeline.

Ethical, quality workmanship

Combined Cycle

- Piping & Valves
- Electrical
- Mechanical equipment
- BOP
- Outage Support
- Logistics

Energy Storage

- Battery system full lifecycle
- Turnkey system
- Logistics

- **Our maintenance goal is to provide:**
- Less maintenance / no rework
- Increase plant efficiency
- Improve plant reliability
- Support OEM warranty work
- Offer performance improvements
- Technical Engineering Support

Our Commitment

Our team have worked for utilities in new construction, maintenance, design, and engineering roles throughout our careers. We are available when you need us and will be there with a drive to complete every turnaround on-time and under budget.

We have worked with partners globally on some of the toughest challenges and can help determine the capital equipment best suited for each application.

Our service team is available to assist with any outage needs at natural gas, and energy storage facilities.

Turnkey Maintenance Service
