Pre-Pay

Our simplest and most popular payment and delivery option is a Pre-Pay plan.

The plan requires advance payment for propane for the upcoming heating season. Locking in the summer contract price and gallon amount to be delivered. We calculate your propane usage history and give you an estimate on what you'll need for the season. You may prepay any amount. **To Guaranty your pre-pay price, PAYMENT must be made within 10 days of calling for / setting up this season's account.** We will work with you to set up payment options

The time to set up a pre-pay plan is in the summer when prices are traditionally lowest!! Setting up pre-pay in the summer protects you from rising costs of propane in winter. Pre-pay customers are placed on delivery routes and their tanks are kept full.

If pre-pay Customers use up their credit before the end of the heating season, they may remain on a delivery route and be billed on 30-day terms. You can switch to a scheduled delivery at this point.

Your pre-pay price (if credit remains) will be locked in until March 31st of 2025. Any amount remaining after that date is a credit on your account, and can be used for the next season/fill.

Budget

Budget customers pay a set dollar amount regularly (monthly) for propane. Payments are set in the summer for each heating season.

Payments start in August and budget accounts...

...are to be balanced/paid in full by July of the next year. Payments are based on estimated average cost of propane for the upcoming heating season and on the estimated usage of propane for the customer.

The advantage of this plan is for those persons that do not have the ability to pay at once for the cost of propane can budget out regular payments. If regular payment is made no finance charges on outstanding balances will be given. Price is 10 cents more per gallon than prepay.

Locked-In Budget Plans fix your cost per gallon through March. You pay on delivery for a locked in price, for delivery through March 2025. Total estimated cost is determined by previous usage. Locked-in budget plan customers need to be signed up by August 31st and are to make each on delivery payment to remain on this plan. This price is 10 cents more per gallon than prepay.

On-Route Customers

On-Route customers are kept on delivery routes and filled on schedule. Regular payment on your bill is needed to remain on an on-route basis. Payments are due in 30 days for customers not on a Pre-Pay or Budget Plan.

Scheduled Delivery Customers

Scheduled delivery customers take responsibility for contacting T-J Gas Company for next delivery. When the propane tank reaches **30%** contact T-J Gas to route your delivery with other customers.

Allowing your propane tank to get too low, having multiple small deliveries to a large propane tank, needing delivery the same day, or afterhours is unnecessary and potentially unsafe.

Therefore:

- There is a **minimum delivery** of propane, **250 gallons** for a **500-gallon tank or larger**, on a scheduled delivery basis. See tjgas.com/delivery-plans for costs with lesser quantities of propane to scheduled delivery customers.

- Any scheduled delivery request must allow us to work the delivery into our routes. Expect to allow at least 48 hours after notification of T-J Gas for your propane delivery. We may deliver sooner if a truck is in your area. **If you are unable to wait** for the truck on one of its **routes**, and need immediate delivery, there will be a **\$120.00** (+ tax) **out of route / afterhours** charge assessed. Our normal delivery hours are 8:00 AM - 5:00 PM Monday – Friday.

- Report **% of gas in tank when you order**. This allows us to prioritize routes. If you are out, or below 5%, T-J Gas is required to **leak check** the gas system and / light any pilots / restart appliances. **There is a \$120.00** (+ tax) fee charged **in addition to** other applicable fees. You are required to be home at the time of delivery in an outage or low percentage situation. This applies to reported out of gas calls, we have to check for leaks.

We require accounts with past due outstanding balances to pay on their account before the next delivery. If you have not paid, or set up a payment plan, contact us. We will work with you.

Automatic and Online Payments

Automatic and scheduled payments are through debit & credit card. Schedule date, amount, frequency. You may make EFT payments, but you must call to have us process each (AutoPay not available by EFT.) Find authorization forms at tjgas.com. || **Pay invoices online, by Card or EFT.** With your e-mail address, we will send you monthly statements, copies of each invoice, and can link you to an Intuit/Quickbooks payment portal to pay on your invoices. See more at tjgas.com/payment-options.
