

SCORPIUS GO 420

Our entry-level Scorpion GO 420 is easy to use. It is lighter in weight than the original Scorpion work light, and the light pattern options are three: flood, wide flood and high beam. Useful in construction, forestry, agriculture, and material handling, the Scorpion GO product family has a square form factor and pedestal mounting. The Scorpion GO 420 produces zero emissions (EMC CISPR 25 class 5) and its light output is 2000 lumens. The Scorpion GO 420 is also available as a MIL-STD-461 compliant version with the Wide Flood light pattern.

Not all products are available in all markets. During continuous improvement specifications and design are changing. All values are nominal values. Illustrations do not necessarily show the design of every version and some features are version specific. The lumens output varies depending on lens colour.
