

“Building Intelligence through LEAN and Agile workflows.”

PARADIGM

The Power of Paradigm

PARADIGM is a business workflow, supply chain & healthcare performance improvement company focused on helping organizations shift from disconnected data silos to a connected omnichannel enterprise through interoperability.

We are a network of professionals along with a consortium of ideas, working together as a catalyst dedicated to empowering LEAN and Agile approaches to enable outcomes which push the limits of collaboration and technology.

We help clients improve processes, remove waste, and exponentially increases in efficiency. We create, introduce, and drive LEAN process improvement in omnichannel partnerships with manufacturers, hospitals systems, and healthcare partners around the world.

Our proven concierge workflow and customized solutions are the competitive edge needed to stay relevant in the digital world.

Metrics alone won't provide the actionable insights a business needs.

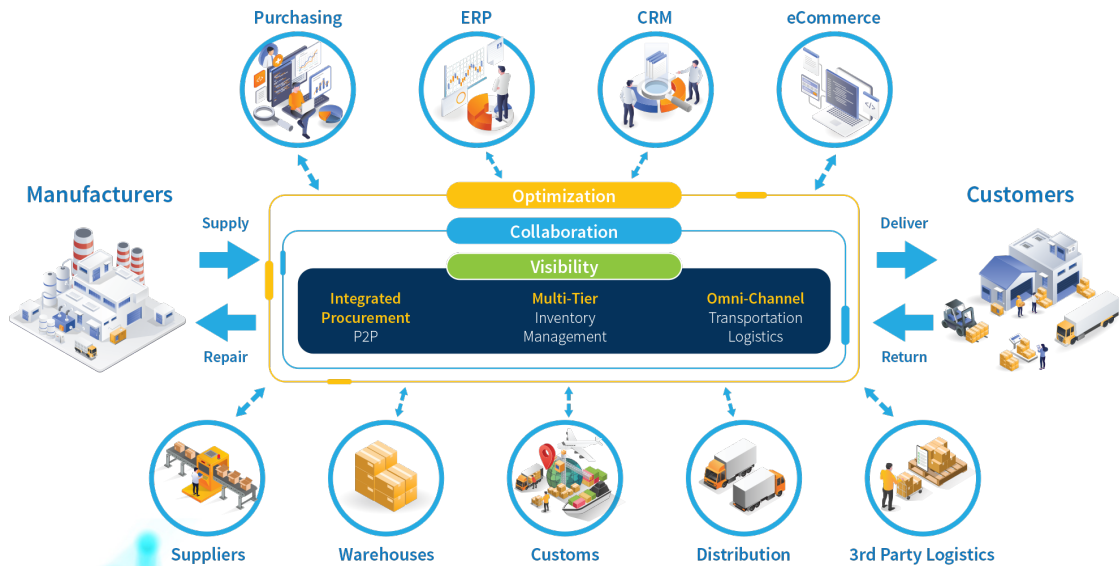

More efficient and integrated exchanges of information are required ...

Increased visibility is required!

The Power of Increased Visibility

A Supply Chain Channel Optimization Platform can be implemented in weeks and connects the fragmented systems landscape across the multi-party network – even if partners are at different stages of digital maturity. Think of the capabilities the platform delivers – visibility, collaboration, and optimization across multi-level order management, multi-tier inventory management, and multi-service transport management – as a corollary to what’s already in place, enhancing it.

Supply Chain Channel Optimization Platform

Business Intelligence Delivered!

AGILE Process Design... the NEW workflow Program Management

Structuring around the Why, What, and How principals ...setting strategy, prioritizing work, and creating visual roadmaps.

Control Tower – End – to – End Supply Chain Solutions

Control Tower & Supply Chain Visibility

Gain timely visibility into all physical flows; granular details, like constraints and service level expectations; and financial details at every touch point. Act on what you see and steer orders from directly within the app to ensure the most optimal and cost-effective movements for channel optimization across the supply chain.

Demand Planning

Automate and streamline returns and advanced replacement flows. Send timely updates across the supply chain. Get real-time visibility and cost control for RGA's, credits and regulatory compliance.

Contract Administration

Gain visibility into all inventory and intelligent precision tracking for fulfillment across global and local suppliers, as well as national and regional depots. Capture serial numbers for re-stocking, refurbishing, and returns, and monitor compliance and regulatory requirements for every part.

Distributor Optimization

Update, validate, and confirm PO orders and optimize inbound shipment orders. Improve customer experience by minimizing stock-outs and boosting agility through better collaboration across suppliers and outsourced partners.

Channel Optimization Offerings

Customize, enhance or create processes that create an environment of success

Contract Administration (GPO & Local)

GPO & ERP Expiring Contracts
New Item Add Requests
Dist. Pricing Program
Impact Analysis – Savings Pipeline (Conversions)
Service Disruptions
Utilization & (Product Optimization)

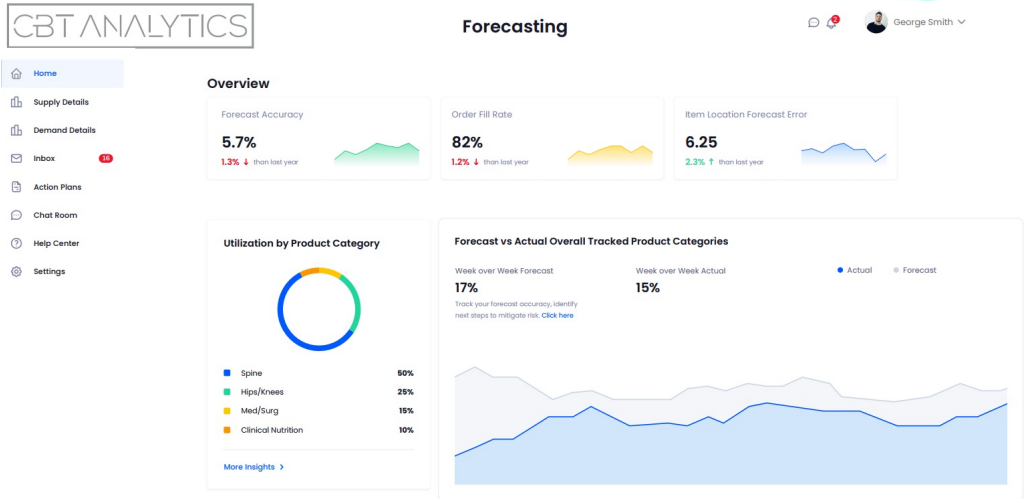

ERP Management (MACD)

Unit of Measure Changes
Discontinued Product
Product Recalls
Conversions
Approved Sub Repository
New Item Adds - Direct
New Item Adds - Distribution
Adding Department & Shipto's

Materials Management

Forecasting Tool
Back Order Management
Rejection Management
Surplus Depletion
Proactive Inventory Management
Gap Reporting
Mirror Subs
Returns & OSI's
UOM Change Requests

Demand Planning and Forecasting Innovation

What does this mean for you?

- Savings for your facility through better inventory management and more efficient processes
- Better assurance of supply
- Appropriately leveraged suppliers with varied geographical and other backgrounds
- Improved patient safety
- Addressing your critical lead times.

Industries We Serve

Manufacturers

Wholesalers & Distributors

Logistics Service Providers

Retailers

High Tech Pharma & Healthcare

Industrial

Consumer Goods

PARADIGM enables service providers, manufacturers, distributors, and logistics providers to thrive in the increasing complexity of their global, regional, and domestic supply chain ecosystems.
