

We are so excited you have found us and we look forward to providing you with the purrfect Maine Coon kitten for your family! When you purchase a kitten from us you are taking home a member of our family. Our cats live in our home with big dogs, little dogs, and of course our King and Queens. Once they are litter trained they have free run of the whole house so they are very well socialized. These kittens have been handled by young and old pretty much from birth so know that you are getting a kitten who is well loved.

We know that when you decide that you want a kitten you do not want to have to wait. We will keep our website updated as to what kittens we have available to go home now, and what kittens we have that will be available at a later date. However, it is likely that you will have to wait just a bit for your kitten but we promise...it will be worth the wait. We currently have 3 queens and each one can have 2 litters a year so we will try to get you your kitten as soon as it is safely possible for the health of our girls.

Our Queens can produce a huge variety of colors and if you would like to get on our wait list for a specific color or sex of a kitten you can contact me and make a \$500 non-refundable deposit and be put on our list. When litters are born, people on the wait list will have first choice of kittens based on where they are on the list. That deposit DOES go towards the purchase price. We do not refund deposits because we breed based on our waiting list and those funds cover the costs of genetic testing, medications, vet visits, special diets, and the cost of running our Cattery. When a litter of kittens has had its first vet visit and they are declared healthy we will reach out to those on our waiting list in order. This usually happens around 8 weeks of age. Those on our wait list will get to select their exact kitten at this time and will have to pay 50% of the total purchase price with their deposit going towards that. The remaining 50% is due when you pick up your kitten.

Our kittens are sold as pet only. We can not sell breeding rights and we do not guarantee show quality. You are required to spay/neuter your kitten between 6-12 months of age.

Male or Female? Many people ask for males because they think they are bigger, more fierce looking, etc. While males can be bigger I have a female that is bigger than my males. Females get large too and as far as how they look...they are every bit as stunning and majestic as the boys so even if your heart was set on a male, always consider a female too.

Our pricing on our kittens is pretty simple. Females are \$2500.00 Males are \$3000.00. Dominant Blue Eyed kittens will be \$4000 regardless of their sex. Kittens with one dominant blue eye and one other colored eye (odd eyes) are \$3500 regardless of gender. If you have any questions please email us at alleycatzmainecoons@gmail.com.

We look forward to having your family join ours and watching your kittens grow!
