

Global Peace PAC

American flag over the U.S. Capitol in Washington, D.C. Photo By: Getty Images

We support longstanding agencies dedicated to peacebuilding activities, including but not limited to:

- U.S. Peace Corps
- U.S. Institute of Peace
- U.S. Department of State
- U.S. Department of Defense
- Millennium Challenge Corporation

OUR MISSION

Global Peace PAC (GPPAC) is the *Political Voice for Americans Dedicated to Global Peacebuilding*. GPPAC advocates for federal leaders and policies that champion people-centered international engagement, cultural exchange, and promote global stability. As a **federally registered Hybrid PAC**, we make direct contributions to candidates and Members of Congress through our PAC as well as influence voters' decision making in key congressional districts through independent expenditures (IEs).

WHY GLOBAL PEACE PAC

America's diplomatic and development infrastructure represents one of our most effective tools to prevent conflict, build partnerships, and advance our national interests. To succeed in protecting and strengthening America's peacebuilding capacity, **we must engage strategically in the political process — traditional advocacy alone is insufficient in today's environment**. We need electoral accountability that demonstrates the political value for those who support these vital programs.

WHY NOW

At a time when authoritarianism is rising, democratic institutions are under pressure around the world, and American influence faces unprecedented challenges, **we cannot afford to underinvest in the programs that build lasting relationships and prevent conflicts before they escalate**. Strategic investments in peace are far more cost-effective than the alternatives.

INVEST IN PEACEBUILDING

Join a strong community of development professionals, former Peace Corps Volunteers, diplomats, and allies who are taking political action to protect and strengthen America's commitment to global peacebuilding.
