

ATV OR SXS BASIC SERVICE

Starting at \$110+HST and supplies. Varies by model, but most times will include:

1. Change engine oil and oil filter.
2. Check air filter.
3. Check front and rear differential/trans fluids.
4. Check axle CV boots for damage.
5. Check steering rack boots for damage as required.
6. Check/top up engine coolant + verify proper cooling system operation.
5. Check engine idle speed.
6. Check front and rear brakes including brake fluid(s).
7. Check/adjust parking brake.
8. Check/adjust throttle.
9. Set tire pressures to specification.
10. Verify all lights (brake, tail, head, accessory), gauges and add on electrical accessories are working correctly.
11. Reset service clock/set time as required.
12. Test drive and report any issues.

Additional Information:

- Non foam air filters will be blown out of dust if still in good condition. Foam oil filters will require extra time to clean/dry/re-oil if dirty (extra time includes cost of cleaner and filter oil).
