## **HOW IT WORKS...**

## M.E.S.H. Game example using Crossover Scoring

## M.E.S.H. Team A

M.E.S.H. Team B

v.s

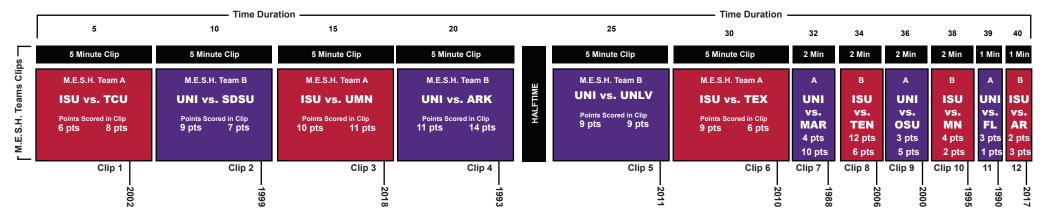

Below, a M.E.S.H. team represents a college program, specifically all of its teams with at least one NCAA Tournament win from 1987 - 2019.

Random clips will be selected from those wins.

## M.E.S.H. Game Scoreboard - Crossover Scoring

Crossover Scoring: In a M.E.S.H. game team A clip, points shown being scored by A (ISU) are awarded (Direct Points) to A (ISU). Points scored by the A's clip opponent "crossover" to M.E.S.H. team B (UNI). Similarly for M.E.S.H. team B's clips.

For example, in Clip 1, ISU (M.E.S.H. Team A) scores 6 direct points, but since ISU's clip opponent, TCU, scored 8 points, those 8 points "crossover" to UNI (M.E.S.H. team B). This makes every point count and requires good defense to win! And fans stay engaged whether their team is on-screen or not.
