

CAPABILITY STATEMENT

Company Overview

Seido Mechanical is a proudly Western Australian-owned mechanical services provider specialising in the maintenance, repair, and diagnostics of **mobile equipment, heavy plant, trucks, and trailers**. Based in East Rockingham, we support contractors, small-to-medium enterprises, and fleet operators across the Perth metropolitan area and WA regional areas.

Our expertise is built on strong technical capability and a commitment to delivering safe, reliable, and efficient mechanical solutions that minimise downtime and maximise equipment performance.

Core Capabilities

1. Mobile Equipment & Plant Maintenance

Seido Mechanical's strongest capability lies in the maintenance and repair of **mobile plant and equipment**, including:

- Mining Equipment, both surface and underground
- Construction and civil equipment
- Generators, compressors, pumps
- Preventative maintenance programs
- Breakdown diagnostics and repairs
- Component replacement and system troubleshooting

Our approach focuses on **reliability, safety compliance, and operational continuity**, ensuring plant remains productive and site-ready.

2. Heavy Trucks & Trailers

We provide comprehensive mechanical services for heavy vehicles, including:

- Engine diagnostics and repairs
- Brake, suspension, and steering systems
- Clutch, gearbox, and driveline repairs
- Cooling, fuel, and hydraulic systems
- Trailer servicing and repairs
- Fleet maintenance and compliance checks

Our diagnostic accuracy and fast turnaround help reduce downtime for transport and logistics operators.

3. Ancillary Equipment (Including Light Vehicles)

Seido Mechanical provides support for **ancillary equipment** essential to business and site operations, including:

- Light vehicles (basic servicing and mechanical support)
- Utes and support vehicles
- Site service trailers
- Portable equipment and attachments
- Electrical and hydraulic troubleshooting

This ensures clients have a **single, reliable point of contact** for all equipment that supports their core operations.

Trade Capabilities

Seido Mechanical delivers services through a skilled, multi-disciplinary team:

- **Heavy Duty Diesel Fitters**
- **Diesel Mechanics**
- **Auto Electricians**

This combination allows us to diagnose and repair **mechanical, hydraulic, and electrical systems** across a wide range of plant and vehicles.

Competitive Strengths

- **WA-Owned & Operated:** Local knowledge, local commitment, and fast response times.
- **Mobile Equipment Expertise:** Deep capability across civil, construction, and earthmoving machinery.
- **Diagnostic Precision:** Modern scan tools and systematic fault-finding reduce unnecessary repairs.
- **Safety & Compliance:** All work meets Australian standards and industry requirements.
- **Transparent Communication:** Clear reporting, honest assessments, and no hidden costs.

Industries We Serve

- Mining
- Civil Construction
- Earthmoving & Plant Hire
- Transport & Logistics
- Small-to-Medium Business Fleets
- Mining Support Services (off-site)

Commitment to Quality & Safety

Seido Mechanical operates with a strong focus on:

- High-quality workmanship
- Quality risk assessments and safety compliance
- Environmental responsibility
- Continuous improvement and technical development

Every job is completed to meet or exceed Australian mechanical and safety standards.

Location

Workshop: East Rockingham, Western Australia
Servicing Perth Metro and surrounding regions.
