

Amine Optimization

Specializing in Amine Unit Performance

Remote Support for Amine Units Worldwide

Amine Optimization Company has the most comprehensive line of REMOTE support services for amine units worldwide. Our operational support and consulting services are matched to individual requirements for improved performance, increased reliability and lower costs.

Remote Amine Unit Process Consulting

- Amine unit process consulting
- Amine unit set-point review
- Amine solvent analysis review
- Equipment evaluations
- Amine Unit process simulations
- Energy and operational cost reduction reviews

Remote Engineering Support

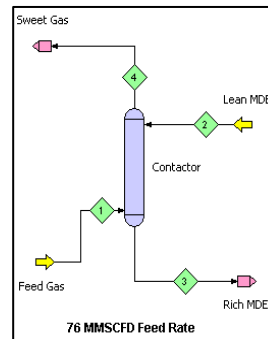

- P&ID review and revalidation
- Process modeling and conceptual design
- De-bottleneck studies and troubleshooting
- Process optimization

Remote Technical Services & Supply

- Amine solvent analysis
- Contaminant analysis
- Antifoam testing
- Parts supply: filters, coalescers, carbon, chemicals

Remote Amine Unit Technical Seminars

- Operations, troubleshooting & optimization
- Energy minimization & solvent protection
- Contamination control
- Foaming & corrosion
