Installation Instructions of the benches/consols to the Floor Plates Whaly 455/R

(only by professional authorized Whaly dealer/workshop)

Please note; Below instruction are very important because of the risks of leaks!

1. Never take out any floor plates.
2. Use only original screws to fit the consols/benches to the floor plates.
3. Pre drill (**3mm**) will be necessary to use the original screws to install the Benches/console to the floor plates (also use enough Kit (Sika). **Pre drill max 29mm deep in the floor plates!**
4. Be sure to place the screws in the pre drilled hole, so there will be no extra/wrong drilled holes and no leaks! (also use Kit (sika))

4.1 Floor plates

4.2 Place the bench, install with Kit and Screws

4.3 Pre drill max 29mm

4.4 Bench 455 inside / use the right screws!

**5. Installation of the console and placing of cables under the floorplate.
(Never take out any floor plates!)**

5.2

5.3

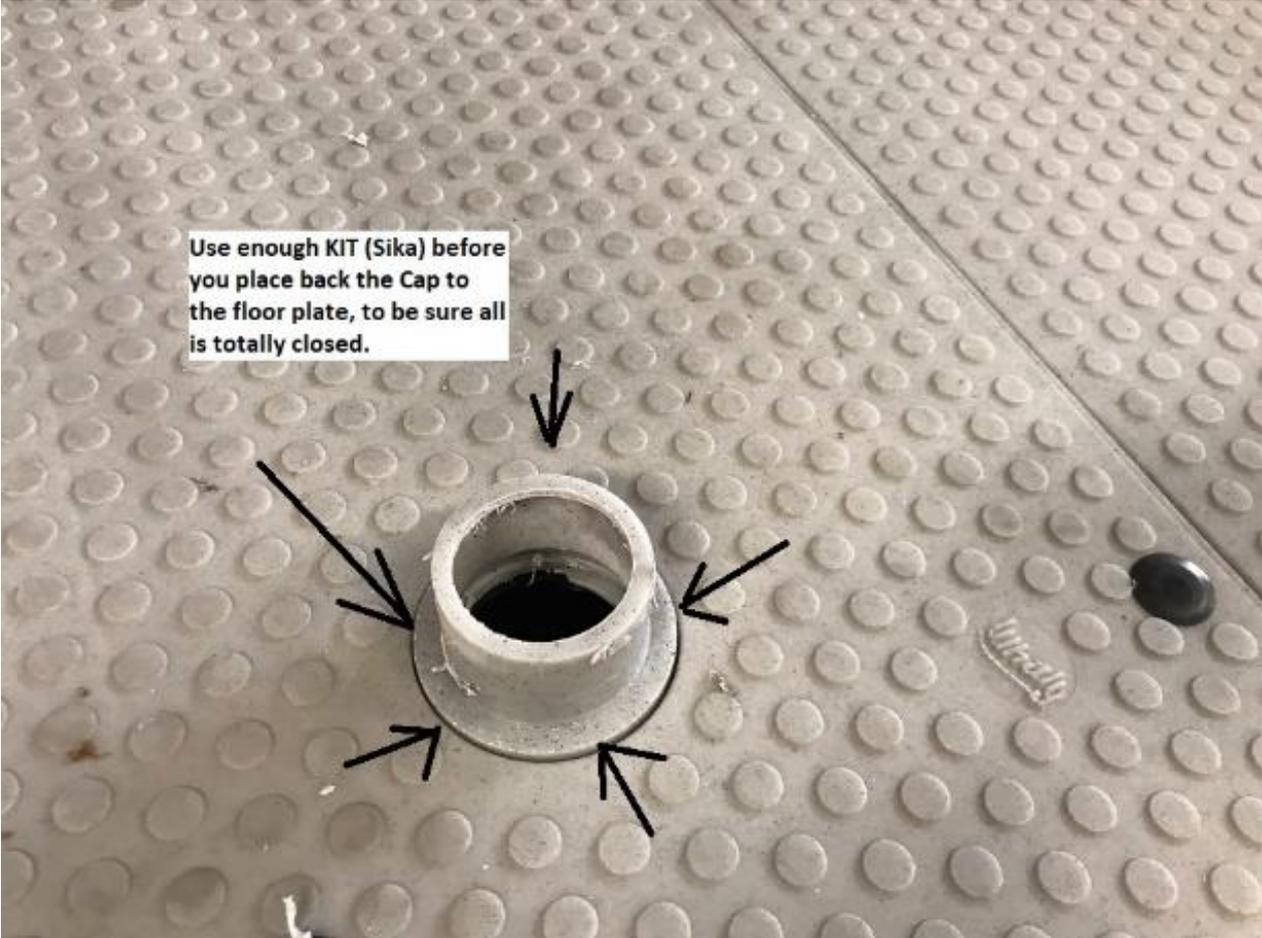

5.4

5.5

5.6 Place back the PE Caps **Up-side-down** and seal with (Sika)KIT

5.7

5.8

Fasten/Install the Console to the Bench

5.9

6. Benches at the side of the boat

This is even more important to do it the right way, because of risks of leaks.

- Use only original (Whaly) screws to fit the benches to the floor.
- First place the bench and fit with Kit (Sika) to the floor.
- Pre drill (3mm) in the Bench and floor, it will be necessary before you use the screws.
- Be sure to place the screws in the pre drilled hole, so there will be no extra/wrong drilled holes and no leaks! (also use Kit (sika))
