Secure, stable, impact
resistant, practical
and durable!

www.whalyboatsusa.com

Installation Instructions of the benches/consols to the PE Floor Plates **Whaly 500 - 500R Professional**

(only by **professional authorized Whaly dealer/workshop**)

Please note; Below instruction are very important because of the risks of leaks!

1. Never take out any floor plates.
2. Use only original Whaly Screws to install the consols/benches to the floor plates.
3. Pre drill ($\varnothing 3 \text{ mm}$) will be necessary to use the original screws to install the Benches/console to the floor plates (also use enough Kit (Sika). **Pre drill max 29 mm deep in the floor plates!**
4. Be sure to place the screws in the pre drilled hole, so there will be no extra/wrong drilled holes and no leaks! (also use Kit (sika))

4.1 Floor plates

Possible position of the Console, and a bench in the back of the boat

4.2 Installation of the console and placing of cables under the floorplate.

(Note; Never take out any floor plates!)

Take out only the (needed) **Caps** in the floor plates

Drill both sides of the Caps

4.3 Place back the PE Caps Up-side-down and seal with (Sika)KIT

4.4 You can place the Console and Benches on the floorplates where you like, with the use of the original Whaly screws (delivered with the console/benches).

Predrill (ø 3mm) will be necessary max. 29mm deep!
(so you will only pre drill in the floor plates and Not into the boat)

You can use **6 screws (+Sikaflex, Kit)** for the benches and for the console.

If you like to install the console in the middle without support of a bench in front of the console,
You can use more screws **8-10** and the use of Kit (Sikaflex) to install the console.

Pre drill **max 29 mm**

Bench 500

4.5 Some pictures (only as examples)
