

Electric Vehicle Charger Installation

Don't leave your EV charger install to just anyone. Using an electrician trained in electric vehicle charger installations will give you confidence the job has been done properly

Certified knowledge and skills

The team at Rivalec are some of the first electricians to be certified in EV Charger installation, testing and commissioning under the Victorian Government's accredited Electric Vehicle Charging Infrastructure pilot course (22609VIC).

Our team have the knowledge and skills to prepare design solutions, discuss options with clients and safely test and commission domestic and commercial charging station infrastructure as well as educating clients on the benefits of EVs.
