

FAST, ACCURATE & EASY TO ADJUST

Renyson comes from a long manufacturing tradition of almost 50 years, combining experience and innovation. Our company, was born as a mold and die manufacturer, so that knowledge in high precision machining has allowed us to manufacture this high-speed cultivator where the small details are essential for great performance

Our goal is to produce the best quality equipment at the best price to help the farmer to achieve his goals in the field.

WE ONLY USE THE BEST COMPONENTS

- **T1 Steel**
 - Pins
 - Bushings
 - Shanks
- **Boron Steel**
 - Coulter and Border Discs
 - Cultivator Blades and Points

LOOK FOR:
"RENYSON HIGH SPEED
CULTIVATOR"

One Tool, all the Adjustments in Minutes

ALWAYS READY TO WORK

Changing the position of the gauge wheels and coultter disc requires only one tool and little time, so the initial setup and adjustments can be made easily, allowing you to concentrate on cultivating instead of calibrating your equipment

High Speed Requires Precision

CONFIDENCE THAT YOU BUY THE BEST

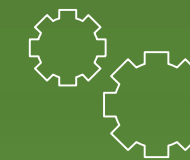

High speed requires high precision parts, that's why many parts of this cultivator are finished sizing in our CNC equipment to fully guarantee it's precision and functionality.

High Performance Blades

ALWAYS SHARP, ALWAYS RESISTANT

We make our own Cultivator Knives using boron steel and our unique hardfacing process which doesn't decrease the hardness of the blade keeping it always sharp and resistant.

CUSTOM SOLUTIONS

Because everyone has special needs we are always open to work as a team to develop new ideas combining our development capabilities with the knowledge and experience of the farmer.
