SECURITY TECHNOLOGY OFFERING

The Sec-Ops integration team has an impressive performance history with the government and industrial clients in security technology.

Design, Build, Engineer, & Install

The Sec-Ops integration team has intimate knowledge of both hardware and software security solutions for your industry budget. Whether you are prepared to invest in a full security system or need assistance with your network, Sec-Ops has the experienced personnel to complete the job. We do panel integration, Access Control systems, installation of IP cameras, and video analytics. Our team of highly trained technicians is up to the challenge. When it comes to the security of your facility, only a properly designed and well-conceived comprehensive plan is adequate to protect your assets. We will design a system that fits both your budget and security mission.

Security Systems Integration Solutions

- Wide area surveillance and CCTV
- Access Control
- Intrusion Alarm
- Outdoor / Perimeter Protection
- Mass notification Systems / Paging
- Intercom systems
- Gate Operators and perimeter sensors
- Emergency communication and Panic systems
- IP Communication Systems

IT & Communications Resource

Sec-Ops is also capable of fulfilling your various Information security technology hardware needs. Our Integration staff can aid your organization with server room design, wide area networks, intrusion detection systems, storage area network design, hardwiring, and cabling solutions as well as technology relocation and recovery installations. In today's IT driven network, communication systems, and security technology it pays to have an experienced and professional staff to ensure the install remains efficient. We provide:

- Cabling / Conduit Installations
- Technology Relocation
- Maintenance Services
- Security Network Design
- Wide Area Surveillance Network Design
- Intrusion Detection Systems
- Remote Monitoring Solutions
- Security System Networking Specialists
- SALTO lock and access control system
