

We make your Secondary Operations our primary responsibility

FACILITY & SECURITY SERVICES

Sec-Ops uses a consultative approach to understand our client's business and technical requirements in order to provide a proactive solution in order to meet their needs.

As a systems integrator, we endeavor to always leverage our client's existing investment in technology before any recommendation of any new acquisitions ensuring a lower cost benefit.

SECURITY TECHNOLOGY

Sec-Ops uses only non-proprietary systems and products in order to support our clients security needs. This enables our team to provide cutting edge technology that will integrate in to the entire system and easily accept new technology as it is developed and released without having to replace the clients initial investment.

NON PERSONAL SERVICES

Sec-Ops will provide the quality personnel services to fill that contracted position, meeting or exceeding the requirements set forth by the client.

EMERGENCY MANAGEMENT

Sec-Ops offers all range of the services designed for companies who have emergency management responsibilities for their facilities and personnel. We can provide assistance in Incident Management; Operational Planning; Disaster Logistics; Emergency Communications; Transportation and housing, services to Disaster Victims.

Who is Sec-Ops?

Sec-Ops is a trusted and experienced Commercial and Government Services contractor in the facility and security services industry. We specialize in the total security services market and with our impressive history coupled with a strong management structure, we provide our clients total security solutions that are affordably priced and establish the base line defense against tomorrow's threats. Sec-Ops has the experience in performing the most demanding services ranging from security technology, guard services, security training, logistics and design-build services for Federal, State, and Local governments across the United States. We emphasize our capability to provide a full range of security products and design services, security guard services, emergency management, facility security operations and maintenance while meeting total quality objectives.

We make your Secondary Operations our primary responsibility

TECHNICAL SUPPORT

The complexities of today's security management systems have taken most end users beyond simple integration. Our tech support personnel leverage the information gathered by both video and physical security management systems and provide an integrated solution for use across all business operations. This is our prime objective.

DESIGN-BUILD SERVICES

Sec-Ops is a solution provider that offers a robust and complete customized service. For Brownsville Navigation District, Sec-Ops assembled the team and designed, integrated and installed the first TWIC compliant access control system as a part of the TSA TWIC pilot program.

TURNKEY SOLUTIONS

Sec-Ops is also a turnkey solution provider that offers consultation and one or more established product packages that allow minimal configuration in order to install.

MOBILITY

We are able to conduct business across the Nation with a suite of security products and services without risk of proprietary systems. Allow us to help take the complexity out of the effective security systems.

Technology Services

We thrive in IP based security systems and network services providing robust security technology for wide area surveillance systems, access control, gate operators, intrusion detection, life safety systems, security systems design services. Our armed/unarmed security guards and force protection services are unsurpassed. As a cleared federal contractor, we provide the "best value" flexible service solutions that are custom-tailored to meet the needs of your facility. Our success is based on delivering the highest level of operational excellence with superior customer service and responsiveness.

Background and past experience: Sec-Ops has extensive experience in Security Systems design/ integration/ installation/ repair/ maintenance/ and restoration services. We were one of four companies selected in a TSA pilot program for the transportation workers identification card program. Sec-Ops designed and built a commercial off the shelf system that supported the TWIC and successfully integrated the TWIC into a viable access control system. As a part of the same grant, we designed and installed a wide area surveillance system that was integrated to the access control system allowing one operator to control the entire Port facility at one command and control console. Sec-Ops integrated and installed the access control and CCTV system for the 10 story addition for the Bexar County Justice Center in San Antonio, TX. Sec-Ops installed the camera system for the high interest training facility at Camp Douglas, Wisconsin. Sec-Ops installed turnstile base access system including biometric readers, cameras, VMS and alarms for Lackland AFB. Contracted by the State of Wyoming for the Army National Guard to design and implement a State-of-the-Art wide surveillance system for Statewide monitoring the Army National Guard's facilities and Assets. Our portfolio includes banks, schools, State buildings and more. We are familiar with all personnel security requirements, Sec-Ops maintains a facility security clearance.

Our employment requirements ensure all personnel will qualify for clearances as required. All personnel currently have TWIC cards and passports. All personnel are background checked for State Licensing and hold valid licenses. Sec-Ops meets all Federal and State regulatory requirements. We follow all required regulations for installation and maintenance services ensuring our clients success in the security mission.
