

We make your Secondary Operations our primary responsibility

FACILITY & SECURITY SERVICES

Sec-Ops uses a consultative approach to understand our client's business and technical requirements in order to provide a proactive solution in order to meet their needs.

As a systems integrator, we endeavor to always leverage our client's existing investment in technology before any recommendation of any new acquisitions ensuring a lower cost benefit.

SECURITY TECHNOLOGY

Sec-Ops uses only non-proprietary systems and products in order to support our clients security needs. This enables our team to provide cutting edge technology that will integrate in to the entire system and easily accept new technology as it is developed and released without having to replace the client's initial investment.

NON PERSONAL SERVICES

Sec-Ops will provide the quality personnel services to fill that contracted position, meeting or exceeding the requirements set forth by the client.

EMERGENCY MANAGEMENT

Sec-Ops offers all range of the services designed for companies who have emergency management responsibilities for their facilities and personnel. We can provide assistance in Incident Management; Operational Planning; Disaster Logistics; Emergency Communications; Transportation and housing, services to Disaster Victims.

TECHNICAL SUPPORT

The complexities of today's security management systems have taken most end users beyond simple integration. Our tech support personnel leverage the information gathered by both video and physical security management systems and provide an integrated solution for use across all business operations. This is our prime objective.

DESIGN-BUILD SERVICES

Sec-Ops is a solution provider that offers a robust and complete customized service. For Brownsville Navigation District, Sec-Ops assembled the team and designed, integrated and installed the first TWIC compliant access control system as a part of the TSA TWIC pilot program.

TURNKEY SOLUTIONS

Sec-Ops is also a turnkey solution provider that offers consultation and one or more established product packages, procedures, or processes that allow minimal configuration in order to implement.

MOBILITY

We are able to conduct business across the Nation with a suite of services and security products without risk of proprietary systems. Allow us to help take the complexity out of the effective solutions.
