

Wellness Retinal Imaging Consent Form

DISEASED EYE

HEALTHY EYE

In our continued effort to bring the most state of the art advanced technology to our office, Dr. Won and Dr. Choe are proud to recommend a special screening diagnostic procedure called the **Wellness Retinal Imaging Scan**. This procedure not only consists of capturing a digital image of the back part of our eye (retina) but also an OCT scan (like a MRI scan) of cross-sectional images of the distinct layers of your eye tissue in real time. This is not an x-ray, and there is no pain nor side effects.

Because many eye conditions can develop without pain or other symptoms, this new technology revolutionizes early detection to safeguard the health of specific structures of your eye such as the retina, optic nerve, macula, and blood vessels. Although this wellness scan is recommended **for all ages**, this permanent record is especially invaluable for those with a history of and/or family history of:

- | | | |
|----------------------------|-----------------------------|--------------------------------------|
| Diabetes | Retinal Diseases | Floaters/Flashing Lights |
| High Blood Pressure | Glaucoma | Decreased or Distorted Vision |
| High Cholesterol | Macular Degeneration | A Strong Glasses Prescription |
| Strokes | Optic Nerve Disease | Unexplainable Headaches |

This test will serve as an initial point from which to compare, as we follow your health in subsequent years.

Currently, most insurance does not cover advanced screening tools.

The screening fee for this is **\$45**. ****service discount for visual field + retinal screening = \$55****

_____ **Yes**, I want to have Wellness Retinal Image Scan.

_____ **No**, I do not wish to have the Wellness Retinal Image Scan.

Patient Signature: _____ **Date:** _____
