

FAST FLOW

Professional Clog Prevention

The best way to treat a clog is to prevent it from happening

GENERAL DESCRIPTION

Fast Flow is the safest, easiest and most cost-effective method of preventing backups in drains while improving drain flow. A unique scum-eating bacterium in a vegetative state for faster digestion, as compared to slow-acting single microbial products used. The specially designed gel binds to the buildup and eats it away. 1 oz per month per drain is all you need.

AREAS OF APPLICATION

Fast Flow is specifically formulated for: Commercial or Residential plumbing, Kitchens & Bathrooms (sinks/showers), Bar sinks, Drains and Soda Lines, Campers & Boats

SPECIAL FEATURES

Fast Flow is time-released for continuous prevention for 30 days

Fast Flow eats scum, converting it to H₂O and CO₂

Fast Flow removes build-up

Fast Flow provides multiple uses per bottle

USE DIRECTIONS

It's a Natural way to clean drains and is easy to use:

1. Open lid
2. Pour 1 oz of Fast Flow around the opening of the drain
3. Rinse lightly with water to make sure gel is in the drain (do not flush with water).

For best results, let Fast Flow sit for 15-30 minutes before running water fully, allowing Fast Flow to bind to the buildup and begin eating away at it.

Packaging: 16 oz Bottle
