

PRO-BAC Bio-Treat 5 Gallon Formula

BACTERIA FOR BIOLOGICAL WASTE DIGESTION IN
GREASE TRAPS, DRAIN LINES, SINK AND FLOOR DRAINS

GENERAL DESCRIPTION

PRO-BAC 5 GALLON FORMULA is a bacteria based granular that treats greasy build-up in drain lines, grease traps, sink and floor drains. The microbial product consumes the build up of fats, oils and grease and produces a by-product of water and carbon dioxide. Great for use in any commercial, industrial or institutional kitchen for treatment of grease traps and drain lines.

AREAS OF APPLICATION

PRO-BAC 5 Gallon Formula microbes have been selectively adapted for their accelerated degradation capabilities of organic compounds. PRO-BAC 5 Gallon Formula is specifically designed for the "NATURAL TREATMENT" of grease traps, drain lines, sink and floor drains, lift stations, etc.

SPECIAL FEATURES

Powerful – yet will not harm drainage systems or plumbing lines – PRO-BAC'S bacterial blend digests through heavy grease accumulations, eliminates causes of noxious odours and reduces crown corrosion. PRO-BAC's Microbe count is 1.35×10 to the 11^{th} per packet. Non-toxic, biodegradable, non-pathogenic, non-acid, non-alkaline, neutral pH and certified salmonella free, PRO-BAC utilizes aerobic, anaerobic and facultative bacteria respiration.

PRO-BAC DOES NOT CONTAIN enzymes, surfactants or emulsifiers.

Fast, easy to use – PRO-BAC acts without agitation, penetrates and accelerates the transformation of organic waste into bacterial biomass, carbon dioxide and water. Eliminates the need for expensive hydro-jetting, pumping and scouring operations and eliminates unpleasant cleaning of putrid smelling grease traps.

USE DIRECTIONS

Grease Traps:

1. Determine amount of PRO-BAC 5 GALLON FORMULA required on a daily basis based on meals/day, as recommended by company consultant.
2. Divide above dosage by 2 and feed through automated peristaltic feeders in equal portions after shut down.
3. Physically inspect traps for 3 months and adjust feed accordingly.

Prior to beginning Treatment of PRO-BAC 5 Gallon Formula: Grease Traps, Septic Tanks or cesspools heavily clogged with solids should be pumped then SHOCKED to prime the system. The shock dosage will vary, depending on the size of the drain lines of holding areas.

Packaging: Granular Pouch or 20L Liquid Pail

The logo for Mac & Co. features the company name in a bold, serif font. The ampersand is stylized and colored blue, while the rest of the text is black.
