

FLOAT-X

Advanced Lift Station Maintainer

GENERAL DESCRIPTION

A high concentration of natural citrus oils that dissolve grease, fat and oils, loosen and remove debris and sediment throughout the entire lift station and deodorize around the clock. Eliminates manual cleaning and minimizes potentially dangerous repairs.

AREAS OF APPLICATION

Used in Lift Stations found in food processing plants, grease traps, waste plants, industrial plants, apartment buildings, hospitals and hotels.

SPECIAL FEATURES

Environmentally friendly - contains no acids, non-caustic substances, and no petroleum solvents. Keeps lines free flowing and leaves a pleasant fresh smelling citrus fragrance. Will not harm digestive bacteria in waste systems.

Produces no flammable fumes or explosive blowback. Will not burn the skin.

USE DIRECTIONS

Lift Stations: To effectively control floating grease and slime in wells, pour enough material to cover build up. Maintain 2.5 cm (1") as a starting point. Once results have been achieved reduce dosage to ¼ of the initial amount. NOTE: ensure that the float is resistant to solvents. Always make sure that there is sufficient water in the well for the product to work efficiently. Use when the water flow is low.

Cleaning and Degreasing: Pour 4 oz/1gal of warm water. Apply generously on greasy equipment, floors, walls etc. Allow to sit for 5 minutes, and then thoroughly rinse with warm water. NOTE: may harm some plastic or painted surfaces. Test on small area before using product.
