To whom it may concern:

I am pleased to recommend Captain Brandon L. Colgan as a Captain/Engineer aboard any luxury sailing or motor yacht vessel. Brandon served as Captain aboard "Kauhale Kai" an ABD 90' expedition style motor yacht for a period in which the vessel was in transition after a worldwide cruise. "Kauhale Kai" is a 159 GT Marshall Islands flagged aluminum hulled vessel with all Caterpillar machinery.

Brandon did an outstanding job both in his performance as a captain and also with the ability to complete several work refit projects which were underway upon his arrival. He was able to handle and organize a small crew to complete the necessary jobs to keep the vessel in operation. Brandon performed his duties as a real professional and I was extremely pleased with his performance.

I would highly recommend his ability to work as a Captain/Engineer for any vessel. He is a hard working, honest, organized and a pleasure to work with.

Larry Barels
