

Theory of Change

First Activity

- In pairs, create a brief ToC for a simple problem
- You've got 10 minutes
- Remember some core elements: actions, outputs, short-term outcomes, long-term outcomes
- Remember the criteria: plausible, actionable, testable
- Don't forget to introduce each other
- Deliverable - verbal description of your program, use at least two new vocab words

Theory of Change - Example

Theory of Change

Paired Exercise

Grocery store parking lots are often littered with shopping carts. This leads to a shortage inside the stores during peak hours. Stray carts can cause damage to cars and degrade mechanically by exposure to the weather.

How can we get the grocery carts quickly back into the store? Solve it.
