Super Cool Science Presents...

ICKY, GROSS, COOL SCIENCE!

~ This show is 1 of 7 amazing shows to choose from ~

A perfect amalgamation*** of some of our favorite icky, gross, and cool recipes collide to introduce one of our most popular science shows. Students explore by observing the use of a leaf blower to send a whirl wind of toilet paper into the sky, the creation of floating, stink-induced smoke rings, and the effects of polymers used in diapers to absorb... whatever needs to be absorbed. Students discover the secret life of polymers through unforgettable scientific recipes to make Jelly-Type Instant Worms, Homemade Giggle Gak, and Hollywood Elephant Snot. Mouths drop to the floor as the unexpected unfolds! This show is not for the squeamish... but all are welcome to attend. Scientific discovery awaits your school today. Book this one soon!

*complete description of
demonstrations available
upon request.

1 hour show
Consists of
9 demonstrations using
Liquid nitrogen &
dramatic
Chemical reactions!
