PROJECT 2023

TRANSPORT

Venezuela
abierta al futuro

FONTUR

Achieve an alliance to install a motorcycle manufacturing facility in Venezuela with affordable prices and a broad commercial network for after-sales service.

Benefited population

1,000,000 users nationwide.

Sector Land

Installation of a motorcycle factory in Venezuela

Goals of the project

- 1- Install a motorcycle factory in Venezuela that allows users to purchase the product at fair prices.
- 2- Through the installation of this factory, we will be able to establish commercial networks that expand after-sales services in the country.

Approximate Investment Amount

25.000.000,00 \$

BUS PLANT YUTONG VENEZUELA, S.A

Recovery of the Yutong bus fleet and possible concession or alliance in their administration.

Benefited population

1,227,500,000 users at the national level.

Sector Land

Yutong fleet recovery **Nacional level**

Goals of the project

- 1- Increase the operation of the Yutong Fleet nationwide, thus reducing the waiting time of users at stops.
- 2- Have more Yutong units operational at the service of the Venezuelan population.

Approximate Investment Amount

24.000.000,00 \$

VICE MINISTRY LAND TRANSPORTATION

Establish alliance for the installation of smart stops in the city of Caracas as a Pilot Plan.

Benefited population

City of Caracas as Pilot plan

Sector Land

Installation of Smart Stops

Goals of the project

- 1- Provide users with an urban location map where they can know the time between units and waiting times.
- 2- Modern stops that improve the quality of life of our users.
- 3- Automation of all internal transportation systems in a city, which could optimize transportation in general.
- 4- Space dedicated to advertising, being an excellent channel to promote products and services to potential clients.

Approximate Investment Amount

9.000.000,00 \$

FONTUR

Install a factory of 12-volt lead batteries with amperages between 250 and 1100, for motor vehicles, motorcycles, light and heavy-duty vehicles, and agricultural machinery, through the acquisition of raw materials such as lead and sulfuric acid.

Benefited population

National Population

Sector Land

FACILITY

from a battery factory
at affordable prices

Goals of the project

- 1- Acquire necessary machinery for the creation of a production line for vehicle batteries.
- 2- Incorporate the quantity of 14,000 monthly batteries for nationally produced vehicles, replacing imported products.
- 3- Generate new sources of direct and indirect employment.
- 4- Contribute to national industrial development.

Approximate Investment Amount

17.000.000,00 \$

FONTUR

Establish alliances with manufacturers and/or suppliers of supplies, parts and pieces that guarantee supply to the carrier's stores nationwide.

Benefited population

National Population

Sector Land

BOOST

the carrier stores
at the national level

Goals of the project

1- Guarantee coverage of supplies, parts and pieces nationwide for the automotive sector.

Approximate Investment Amount

5.000.000,00 \$

CORPOLOGISTICA

Installation of an assembly plant for cargo transport units with a nationwide network of dealers that guarantees the provision of after-sales service.

Benefited population

Sector transporte de carga.

Sector Land

FACILITY

of an Assembly Plant
**cargo transportation in
Venezuela**

Goals of the project

- 1- Ensamblar unidades de transporte de carga eficientes y a precios accesibles para su comercialización en todo el país.
- 2- Garantizar el servicio post venta a las unidades de transporte de carga, logrando así su operatividad en el tiempo.
- 3- Generación de empleos directos e indirectos que incrementan el desarrollo de la economía.

Approximate Investment Amount

120.000.000,00 \$

CORPOLOGISTICA

Establish an alliance with a company that manufactures cargo transportation units with financing aimed at the public and private sector.

Benefited population

National Population

Sector Land

FINANCING

Of cargo transportation for **the public and private sector**

Goals of the project

- 1- Increase in cargo transportation units for both the public and private sectors.
- 2- Favorable financing for this transport sector of 500 cargo trucks between 8 to 10 tons and 500 trucks with a platform.

Approximate Investment Amount

64.000.000,00 \$

Goals

1- Support for the design and construction in Venezuela of ships and navigation accessories, adapted to our realities and needs, but incorporating cutting-edge materials and devices.

2- Preparation of a project for the modernization of the cruise port of La Guaira, state. the guaira

3- Construction of deep water ports in:

- 1) Orinoco Delta
- 2) Carenero – state. Miranda
- 3) Araya peninsula - Sucre state.
- 4) Port. Cabello – Carabobo state

Aquatic Sector

- a) modernization and technical equipment for marine fire stations and maritime police nationwide.
- b) Acquisition, installation and activation of equipment corresponding to the global maritime distress and safety system (gmdss).
- c) Joint exploration of the exclusive economic zone, contiguous zone, high seas and the country's international rivers, to establish a database of the potential there.

Goals

d) Promote the formation of companies for the breeding and replanting of marine species of sporting, tourist and food interest in aquatic spaces.

e) Equipment for the simulator dinner in the areas: bridge, machines, electronic nautical charts, operations with tugboats, etc.

f) Establish cooperation mechanisms for the construction of ships, yachts and other small vessels, maintenance and repair of ships, recycling of ships and creation/expansion of modern technologies, through the construction and modernization of shipyards.

Aquatic Sector

g) Acquisition of tugboats and pilot boats for the strengthening and modernization of the provision of these services.

h) Implementation of an automated (digital) system to implement the harmonized system of recognition and certification (sarc)

**NATIONAL INSTITUTE OF
CANALITATION (INCANAL)**

Goals of the project

Aquatic transportation of national and international products and, therefore, increased economic gains for the nation, generating strengthening of local programs, greater distribution of income and opportunities for adjacent population centers, facilitating the overcoming of inequalities in the living standards of the population and favoring the fulfillment of social equity.

Recovery
navigation channel
Maracaibo lake

Aquatic Sector

It is worth highlighting the importance of involving the residents of the areas near the project, since it would be encouraging complementary economic activities to support its technical execution.

Approximate Investment Amount

95.335.253,57 \$

NATIONAL INSTITUTE OF CANALITATION (INCANAL)

Asphalt Concession and Exploitation
Guanoco Lake and Reactivation
River Navigation Channel
San Juan River – Monagas state

Aquatic Sector

Concesión Explotación

Goals of the project

Water transportation of national and international products, increasing economic profits for the nation, generating the strengthening of local programs and greater distribution of income and opportunities for adjacent population centers, facilitating the overcoming of inequalities in the population's living standards and favoring compliance with social equity.

Approximate Investment Amount

200.000.000,00 \$

DIANCA

Have a workshop with a production line suitable for the construction of vessels in naval aluminum material, to reduce response times to meet the demand of the National Waterway Plan. However, the construction of aluminum boats represents a lower maintenance cost compared to steel boats, so its production guarantees long-term solutions for the aquatic sector.

Aquatic Sector

Construcción del Complejo DIANCALUM

Goals of the project

The manufacture of Naval Aluminum Boats

Approximate Investment Amount

8.700.000 \$

DIANCA

Construction of:

One (01) new Dry Dock

One (01) Floating Dock

Machinery and dock workshops to increase the installed capacity of the Shipyard

Project investment

Goals of the project

Aquatic Sector

DIANCA has land space to expand its operational capabilities, to be able to serve vessels larger than 30,000 dwt, and provide services to the demand for large vessels that carry out activities in the Caribbean Sea.

Approximate Investment Amount

633.157.553 \$

DIANCA

Construcción de:
Una fosa para el desguace
industrializado y protocolizado de
embarcaciones y medios navales

Aquatic Sector

Project investment

Goals of the project

La disposición final de las embarcaciones conlleva a desarrollar varias tareas que van desde la protección del ambiente, el reciclaje de material para la transformación de material, el reúso de equipos para otras embarcaciones y la disposición final de desechos sólidos y líquidos de forma correcta, cumpliendo con el plan de la Patria en su V Objetivo y las 3 R impulsadas por el Gobierno Nacional

Approximate Investment Amount

3.100.000 \$

DIANCA

Aquatic Sector

Construction of a shipyard in the state of Bolívar, west of Puerto Ordaz, on the right bank of the Orinoco River

Construction

of the DIANCALUM
Complex

Goals of the project

1. Increase the capacity to build ships in the national territory.
2. Strengthening the Venezuelan naval industry and dynamizing the productive chain of the rest of the industries in the sector.
3. Strengthening the national maritime industry.
4. Generation of 519 direct jobs and a significant number of indirect jobs.
5. Increase of specialized hand in the naval industrial sector.
6. Project presented by the Associated Russian Construction Corporation, within the framework of the Commitment Minute (Russia-Venezuela) of April 2, 2012.

Approximate Investment Amount

902,900 (MILLONES) Estimado en el año 2011

BOLIVARIANA OF AIRPORTS BAER, S.A

It has 51,210 MTS2 for investment areas for the lifting of important Projects in 4 of our main international airports that could contribute development to the country's economy:

- G/J Santiago Mariño International Airport in the State of Nueva Esparta.
- La Chinita International Airport in Zulia State.
- Oscar Machado Zuluoaga International Airport in Charallave.
- International Airport
- Juan Pérez Alfonzo del Vigía – Mérida state.
