

CalForth
Construction Ltd

Information Booklet

Company Bio

CalForth Construction Ltd are a Building, Civils & Landscape Contractor who place the needs of our clients at the heart of all our work. Providing safe, reliable, on time & on budget projects for our clients is our primary objective.

The company was formally founded in 2022 and has rapidly grown from what commenced as a 2 man partnership to a 50+ Employee £8m+ turnover limited company.

Our business has been heavily involved in numerous Net Zero projects, and we specialise in deliver civils packages along with cable pulling and pipe laying. We have experience working with District Heating Networks, Energy Centres, Solar Power Farms, EV Charging Points, Wind Turbines & Waste Water Treatment Plants.

Our expertise in building has seen our multi-trade business win contracts for Warehouse Unit Extensions, University site management & maintenance, house extensions and landscape renovations.

We would love to connect with you and tell you more of how our company can help provide solutions for your projects.

HAMILTON WWTW

We worked with our client in providing a Waste Water Treatment Works in Hamilton. Our part was the excavation of land associated with old tanks to fabricate and install concrete bases which were used to house turbines used for power generation.

0.42 GWh of electricity each year
1st of its kind project in the UK
£120k budget

UNIT EXTENSION

Project managed an extension to an existing unit in Cupar. We prepared land, dug out and installed concrete bases for steel pillars, erected steel frame, poured and finished polished concrete floors, installed internal wiring & office spaces and completed safety certificates and sign off of structure.

650m2 unit extension
Fully insulated building
£420k budget

EV CHARGE POINTS

Delivering a Civils Package on a new EV Electric Super Hub for our client. The facility was installed in a Retail Park which remained open through out the project.
We delivered all the civils aspects of the project along with pulling cables along channels to allow connection to the grid.

Up to 180KW charging units
12 seperate charging bays
£114k budget

DUFC STADIUM RENOVATIONS

The CalForth Construction Arena @ Tannadice Park took our name is 2024 - and we haven't stopped working there since.
From stadium bowl improvements to , training facilities, changing rooms and hospitaltiy areas, its been a major ongoing project and one we have loved every minute of.

8 hospitality areas overhauled
Match day facilities modernised
£650k+ works delivered

RELATIONSHIP SCOTLAND

Working alongside one of our clients, we delivered a community benefit project for Relationship Scotland's Dundee Facility.
Falling in to a state of disrepair, the charity were struggling with a barely useable outside space. We came in and transformed the areas, installing low maintenance astro turf, new benches and climbing frames, a shed and patio area for storage along with planter areas to finish it all off.
