

SARANOVA SOUND

Welcome to a New Voice for the Gulf Coast

Founders Note: “A New Rhythm for the Gulf Coast”

The Gulf Coast is entering a new era — one defined not by congestion, noise, or environmental strain, but by clarity, connection, and purpose.

Saranova Marine was born from a simple belief: our waterways deserve to be experienced the way they were meant to be — quietly, cleanly, and with a sense of ease that brings communities closer instead of pushing them apart.

For decades, we’ve built our coastal lifestyle around the water while relying almost entirely on roads. That imbalance is holding our region back. Saranova exists to change that — through all-electric, wake-free vessels that honor the ecology of the Gulf while unlocking a new class of mobility.

This first edition of *Saranova Sound* is our declaration.

Who we are. Why we’re here. And what we’re building for the Gulf Coast and the generations that will follow.

— Adam N. Germany, Founder

SARANOVA

MARINE

WHAT IS SARANOVA SOUND?

Saranova Sound is the official founder-led newsletter of **Saranova Marine** — a clean-tech, community-first company building the Gulf Coast’s first all-electric hydrofoiling water mobility network.

This publication exists to share our vision, our philosophy, and the unfolding story of how Saranova Marine is redefining movement across the Gulf Coast.

Here, you’ll find:

- the ideas shaping our mission
- insights about mobility, ecology, and clean technology
- a behind-the-scenes look at the build
- our commitment to community luxury
- the values guiding every decision

This is where our voice lives.

Where clarity replaces noise.

Where vision becomes story.

Where a regional movement takes shape.

This is where the story begins.

COMMUNITY SPOTLIGHT — “Why the Gulf Coast Matters”

Saranova Marine is a **community luxury brand** — not luxury in the traditional sense, but luxury defined by:

- clean water
- quiet travel
- beautifully connected communities
- mobility that elevates daily life
- ecological responsibility
- access for residents, students, workers, and visitors

Our region deserves more than transportation.

It deserves movement that reflects its beauty.

A step into a Saranova vessel shouldn't feel like catching a ride.

It should feel like stepping into the future of the Gulf Coast.

BEHIND THE BUILD — “The Architecture of Saranova Marine”

Saranova Marine is building the Gulf Coast's first dual-division electric mobility platform:

SWS — Saranova Water Shuttle

Clean, wake-free public and institutional water mobility that:

- connects colleges
- supports employers
- provides commuter pathways
- alleviates seasonal congestion

PLT — Private Luxury Transport

A premium, on-demand experience for resorts, HOAs, and private members, using an 20-passenger Candela P-12 configured for elevated service.

This dual-division model ensures sustainability, scalability, and long-term profitability — while keeping community benefit at the center.
