---

## Welcome

At Casey Concrete, we take **great pride** in **our commitment** to crafting beautiful and durable concrete landscaping products that enhance the beauty and functionality of outdoor spaces. Our skilled team and incredible working partners work to use only the best materials and the latest techniques to create unique, long-lasting concrete products that exceed our customers' expectations.

Whether you're a homeowner looking to add some **visual interest** to your backyard, a contractor searching for **high-quality pavers** for a commercial project, or a landscaper seeking unique and functional accents to elevate your designs, our extensive range of concrete landscaping products has something for everyone.

From stunning concrete retaining walls, and elegant concrete pavers, to sturdy concrete benches and tables, we can offer a **wide variety** of designs, sizes, and colors to match any style and budget.

# The Casey Way

Casey Concrete has produced quality Ready-Mix concrete and concrete products **since the 1950's** in Atlantic Canada. **Family owned** and **operated** throughout its history, Casey Concrete has grown through customer service and technical expertise in all areas of concrete technology.

Casey Concrete has developed a line of concrete landscape products that meet the demands of Atlantic Canada.

**Produced in Amherst**, Nova Scotia in the most modern concrete products plant in Atlantic Canada, Casey Blocks are built to last.

**We stand behind our products** and take pride in our customer service.

# LANDSCAPE PRODUCT DISCLAIMER

## COLOUR

Concrete products are composed of natural raw materials and therefore slight colour variances should be expected. For our products that are coloured with pigment during production, the recipes are designed with natural raw materials such as the sand and stone, allowing the products to vary slightly in colour tone, veining and texture from one unit to the next. Therefore, colour samples are approximate representations of our standard colours and actual product colours may vary. Final colour selection should be made at your local dealer from stocked product.

Casey Concrete recommends immediate verification of product condition and colour upon receipt. If there are any discrepancies, contact your dealer before continuing with the project. Installation of the product constitutes acceptance of the product.

## COLOUR DISTRIBUTION AND LAYING METHOD

Proper installation enhances the overall colour of a project. Where possible, product should be randomly selected from at least two pallets when installing. This creates an attractive and subtle blending of colour.

## EFFLORESCENCE

Efflorescence is a naturally occurring process in all concrete products and may appear on the product surface as a white powdery substance. Efflorescence is more noticeable on darker products due to the contrast with white. Efflorescence does not, in any way, compromise the functionality, structural integrity or long-term durability of the product. We take every measure in our production process to reduce efflorescence but eliminating all efflorescence from ever occurring is not possible. However, it will wear or wash off over time or can be removed with an efflorescence removal product. Casey Concrete accepts no responsibility or liability for this naturally occurring condition to which all concrete products are susceptible.

## PLEASE NOTE

Concrete and concrete products are manufactured from raw materials and therefore variation in colour and texture can occur.

## PRODUCT DIMENSIONS

Metric dimensions indicated are accurate to the nearest 1mm. Imperial units are rounded to the measurements they are most often known as.

# CONCRETE MASONRY AND LANDSCAPE PRODUCT WARRANTY

## DEFINITION OF WARRANTY

Casey Concrete hereby guarantees that, on the date of delivery, its concrete products meet or exceed the current applicable standards set by the CSA (Canadian Standards Association).

Under the strict condition that the provisions stated hereinafter are complied with, Casey Concrete guarantees the structural integrity of its concrete landscaping and masonry products, for a minimum period of fifty (50) years from the date of purchase of the product. The warranty applies to normal, non-abusive use of the product. It covers any abnormal deterioration of surfaces that may be caused by typical use of sodium chloride for de-icing pavers, slabs or steps.

## WARRANTY EXCLUSION

The warranty does not apply to spalling or other breakages caused by impacts, abrasions or over stressing. The warranty does not apply when deterioration results from design or installations not complying with applicable codes, standards and recognized best work practices and procedures.

The warranty does not apply to any impacts by any mechanical snow removal equipment.

This warranty does not apply to any damage resulting from an "Act of God" or damage that results from a deliberate act or negligence on the part of the customer, owner, installer or third party.

## IMPLEMENTATION OF WARRANTY

In the event of a claim, the Customer must present a valid proof of purchase, namely the invoice and delivery slip(s). Casey Concrete will supply, free of charge, a new product in replacement of the defective one if necessary, following inspection of the product by Casey Concrete or one of its representatives or agents. Installation expenses remain the responsibility of the Customer.

## TRANSFERABILITY

The warranty is transferable to the current owner or to any subsequent owner of the building or the job, on the condition that it is accompanied by a valid proof of purchase and certificate of warranty.
