DYNAMIC PAINT BRUSHES

Premium

The ***Dynamic Eminence***, ***Aristocrat*** and ***Commander*** premium series of brushes are an ideal solution when a high-quality finish and durability are desired. Each brush is handcrafted and inspected to ensure that it meets our professional standards. Featuring a concentrated group of styles, sizes and filaments, Dynamic premium brushes are recommended for interior or exterior use with all latex and oil-based paints, stains, varnishes, enamels and clear finishes.

The ***Dynamic Eminence*** and ***Commander*** series feature solid, round and tapered filaments (SRT). Unlike hollow polyester filaments, solid round filaments are designed to hold their shape and perform well even after repeated uses and cleaning. ***Eminence*** brushes are manufactured from high quality polyester (PET) and are blended with nylon filaments that are chisel shaped for a firm feel. This makes for an ideal brush in exterior use applications and on rugged textured surfaces. The ***Commander*** series is 100% polyester (PET) that are soft-to-touch and meant for applications such as painting fine interior finishes, smooth surfaces or delicate projects. ***Aristocrat*** bristles are 100% Natural China Bristles which are naturally tapered, tipped and flagged. The flagging that occurs on the tips of the natural bristles allows for better paint pickup. The softer nature of the bristle also permits a smooth finish with fewer brush marks. This makes it ideal for clear oil-based varnishes, polyurethane and enamels.

All Dynamic Premium brushes have the filaments set in epoxy and precisely placed wooden wedges are employed to create an ideal “well” to hold paint. Sanded, unvarnished hardwood handles with stainless steel, squared ferrules enhance the performance of these brushes and provide for a premium paint applicator.

Professional

Dynamic ***Solomon*** brushes are an ideal solution for production painting and heavy use applications. Each brush is handcrafted and inspected to ensure that it meets our professional standards. Dynamic ***Solomon*** brushes are recommended for interior and exterior use with all latex and oil-based paints, stains and clear finishes. Featuring solid, round and tapered polyester filaments (SRT), blended with nylon filaments, which are then cut at an angle, resulting in a fine, chiseled end. Unlike hollow polyester filament, solid round filament are designed to hold their shape and perform well even after repeated uses and cleaning. The filaments are set in epoxy and precisely placed wooden wedges are employed to create an ideal “well” to hold paint. Sanded, unvarnished hardwood handles with stainless steel, squared ferrules enhance the performance of these brushes and provide for a more professional “look and feel”.

Consumer

Dynamic also offers a range of quality Consumer brushes. They include the ***Paint Pal*** and ***Ovation*** series of brushes. Both ***Paint Pal*** and ***Ovation*** feature hollow, round and mechanically flagged gold and white, 100% polyester (PET) filaments to create a soft feel when painting. The filaments are set in epoxy and precisely placed wedges are employed to create an ideal “well” to hold paint. They are designed for all paints but are best suited for use with latex paints and stains. ***Paint Pal*** has a soft, comfort grip rubberized handle for ease of use. ***Ovation*** has a thin plastic handle for smaller hands and extra control.

PRODUCT DETAILS

WHITE BRISTLE

BEST **Aristocrat**

- For all alkyd or oil-based paints, stains, varnishes, enamels and clear finishes
- Premium quality
- 100% Natural White Bristle
- Naturally tapered, tipped and flagged bristles
- Stainless steel, nailed, square ferrule
- ferrule
- Unfinished hardwood handle

POLY / NYLON BLEND

BEST **Eminence**

- For all latex and oil-based paints, stains and clear finishes
- Premium quality
- Blended Nylon and Polyester Smooth, solid, round and tapered, chiseled end filaments
- Stainless steel, nailed, square ferrule
- Unfinished hardwood handle

BETTER **Solomon**

- For all latex and oil-based paints, stains and clear finishes
- Professional quality
- Blended Nylon and Polyester Smooth, solid, round and tapered, chiseled end filaments
- Stainless steel, nailed, square ferrule
- ferrule

POLYESTER

BEST **Commander**

- For all latex and oil based paints, stains and clear finishes
- Premium quality
- 100% Polyester
- Smooth, solid, round and tapered filaments
- Stainless steel, nailed, square ferrule
- Unfinished hardwood handle

BEST **Paint Pal**

- For all latex and oil-based paints, stains and clear finishes
- Consumer quality
- 100% Polyester
- Gold and white filaments
- Stainless steel, nailed, round ferrule
- Soft, comfort grip, rubberized handle

GOOD **Ovation**

- For all latex and oil-based paints, stains and clear finishes
- Consumer quality
- 100% Polyester,
- Gold and white filaments
- Rust resistant steel, crimped, rounded ferrule
- Plastic handle

BRUSH COMPONENTS

Filament

The working end of the brush, made with synthetic or natural bristle materials.

Ferrule

Metal band that holds the filament and handle together. Attached by nailing or crimping to a wood or plastic handle.

Handle

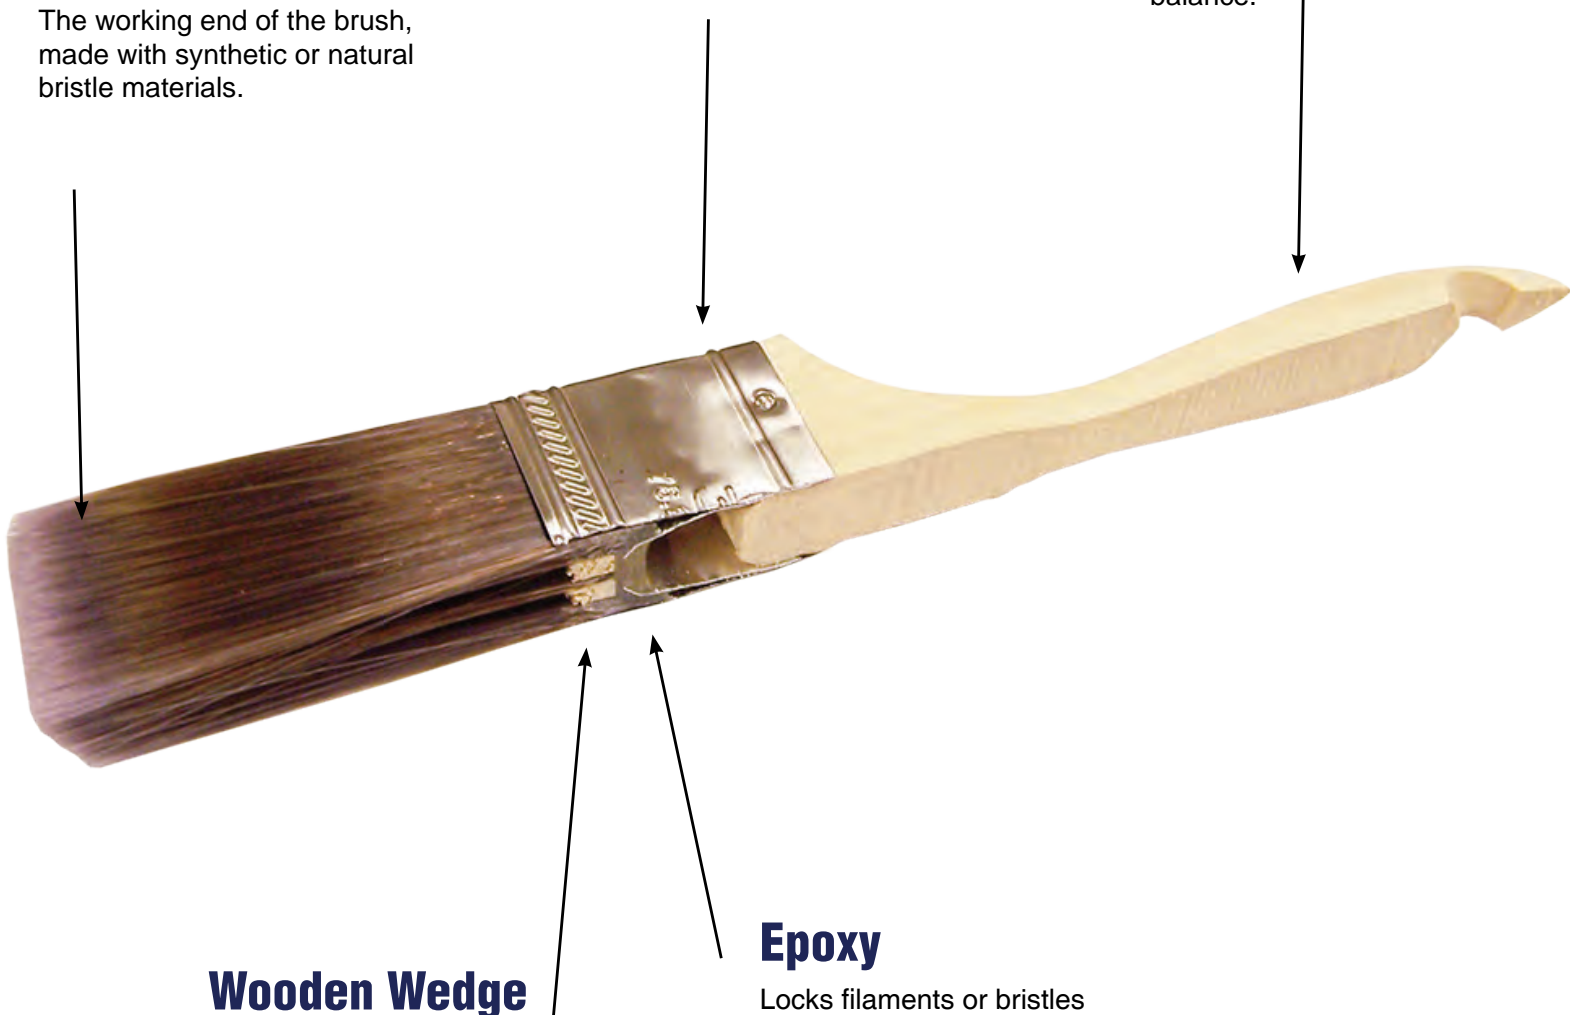

Made of wood or plastic provides comfort and good balance.

Wooden Wedge

Creates a well to hold paint.

Epoxy

Locks filaments or bristles in place.

PREMIUM

Eminence - Angle Sash

Premium quality. Nylon/Polyester blended filament provides a firm feel that delivers premium performance and professional results in both oil-based and latex paints. Features a squared stainless steel ferrule, unfinished hardwood handle and smooth, solid, round and tapered, chiseled end filaments.

DYNAMIC ROLLER COVERS

Dynamic Roller Covers are manufactured to exacting standards and come in a variety of styles and sizes. Whether the surface to be painted is smooth, or heavily textured, we have the right roller covers for the job.

The **Dynamic MPR Microfiber**, **Infinity Lint Free**, **Natural Sheepskin** and **Mohair** series make up our premium offering. Our **One Coat** and **Multi-Purpose** series are excellent alternatives for most contractor and DIY applications. All of our roller covers feature solvent resistant cores. They are made from either polypropylene or PVC. The spiral wound polypropylene cores are used with premium rollers for greater adhesion, shed resistance and strength. A heated thermobond adhesive process is used with the polypropylene cores to promote excellent adhesion as well as creating a premium quality finished product. All natural and synthetic fabric used is of the highest quality and each roller cover is cut to accurate sizes and trimmed for uniform results.

The customary 9" roller cover products are further augmented by special purpose 3", 4", 7" and 18" standard diameter roller covers, and a broad offering of 4", 6" and 6.5" mini rollers. The end result is a group of products to cover virtually any application need.

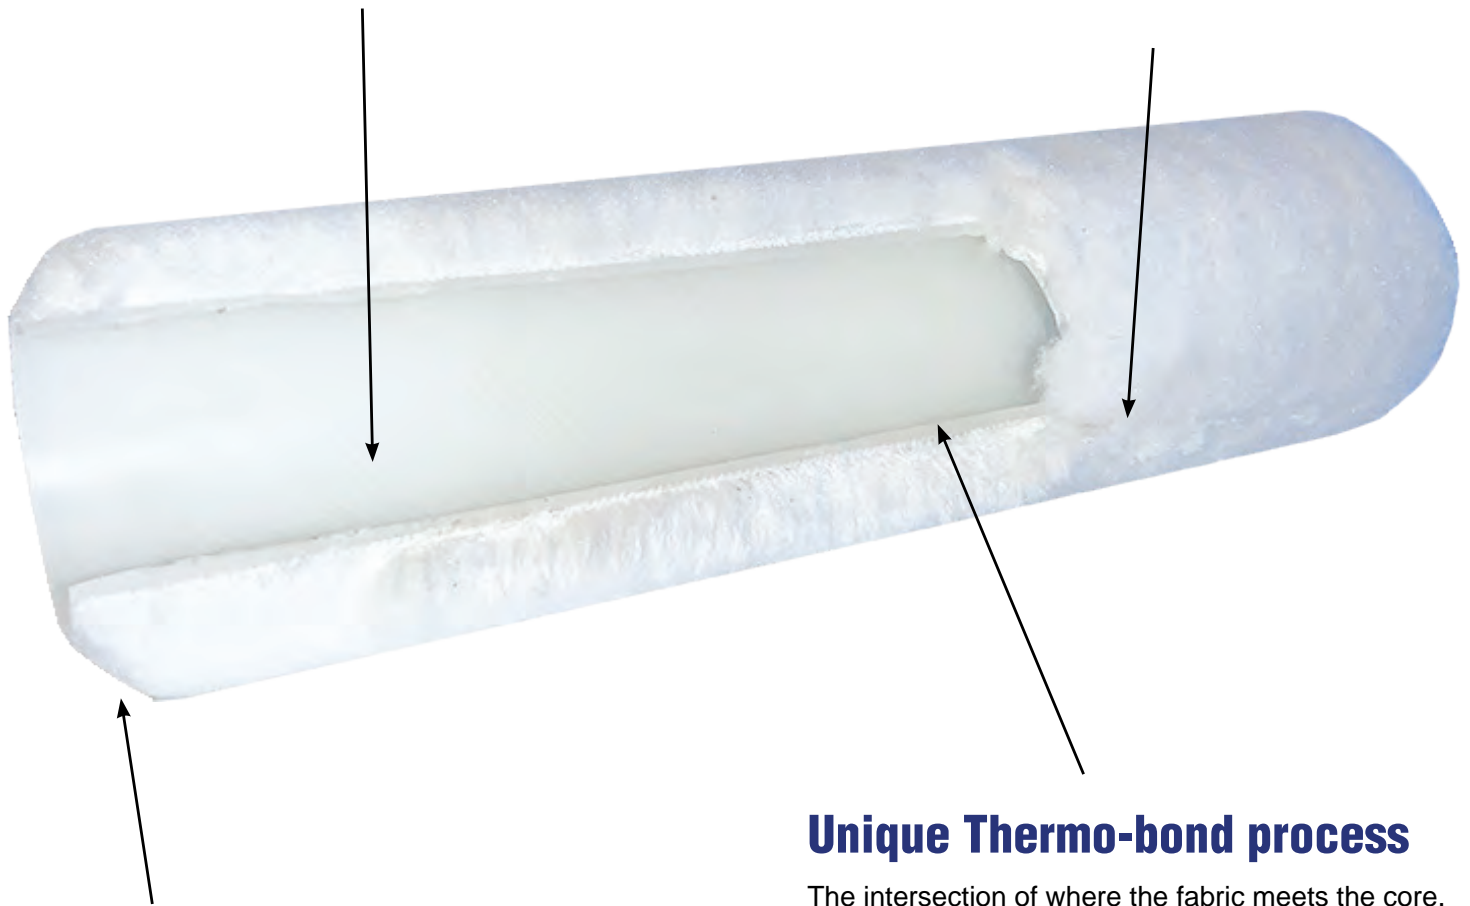

ROLLER COVER ANATOMY

Polypropylene Core

Moisture and solvent resistant. Found on the inside of the roller cover.

Fabric

Microfiber, woven, knit and natural blend fabric offerings are available. They are each individually tailored to meet the project, surface and price points desired.

Bevel Edge

Helps to reduce ridges and eliminates paint dumping.

Unique Thermo-bond process

The intersection of where the fabric meets the core. Results in the roller cover fabric backing being thermally fused to the core.

Professional Roller Frame - Tight Lock

Heavy Duty Professional grade frame with a chrome plated 5/16" (8mm) shank and 90 degree angle. Tough, fiberglass-reinforced nylon cage and end caps contain smooth rolling internal bearings, eliminate shank wear. The special cage design provides uniform support of the roller cover to aid in even paint application and roller cover wear. Unique retaining springs prevent roller cover slippage but still allow for one-tap release of the roller when ready to clean up or change colors. Full-size, non-slip, polypropylene grip handle has reinforced threads which accommodates all extension poles.

PLASTIC DROP CLOTHS

High Density Painters Plastic Drop Sheet

Dynamic high-density boxed poly sheeting is a cost effective light weight film in a convenient dispenser box. It holds in place as it clings to horizontal or vertical surfaces during taping with its natural electrostatic properties. Perfect for painters, drywallers, and other light duty applications as a drop sheet or to cover and protect items. The dispenser box allows you to roll out the exact length of material required and cut it off with a knife or scissors. The box format travels well and is easier to handle and store than long poly rolls. Perfect for taping, draping, drop sheet cover and as an overspray shield.

UPC	MFG	Size	Thickness

BUCKET GRIDS

2 Sided Bucket Grid

Economy, 2-sided, solvent resistant, bucket grid saves time and money. Attaches to the lip of the can. Made from galvanized steel with reinforced edges, use this bucket grid with any 1-gallon or 5-gallon bucket to avoid messy paint trays and to keep you mobile as you work. When roller rolls across sturdy metal grid, excess paint is removed and paint is distributed evenly on roller cover to assure even application.

PAINT HOOKS

Swivel Paint Bucket Hook

Easily attach your paint can handle to your ladder, windowsill, etc. Use with one gallon pails. Specially designed to hold paint cans and cleaning buckets firmly without spilling. For painters, decorators and window washers. Holds paint can securely on all type of ladders. Sharp pointed hook with swivel allows it to hang anywhere. Swivel allows you to easily turn can. Snap catch to hold bucket handle. Made of hardened steel, nickel plated to resist corrosion. Universal for both left and right hand side of ladder. Suitable for use with indoor or outdoor painting projects. Swivel joint allows free movement for ease of use. Quickly hook paint can on and off.

UPC	MFG	Cs Qty
064784706008	70600	12

Paint Pot Hook - Display included with purchase of 20

Pail and paint hook can be easily clipped to the handle of paint buckets or mixing pails and then attached to the rungs of a ladder. For painters, decorators and window washers. The pail and paint hook helps to securely hold the paint or stain to the ladder, allowing the worker to concentrate on the job at hand. Flat end of pot hook acts as a paint can opener. Made of hardened steel, nickel plated to resist corrosion. Hangs on right hand side of ladder. Suitable for use with indoor or outdoor painting projects. Display bucket promotes impulse sales. Quickly hook paint can on and off.

MIX AND MEASURE

Mix and Measure Containers

Mess free paint mixing. Accurately measure and mix paint, primers, stain, epoxy and polyester resins, clears, single stage, base coat and any refinishing product in these sturdy, solvent resistant clear plastic mixing cups. Graduated measurements make mixing easy and accurate. Calibrated for measuring in both ounces and milliliters. Larger cups add quarts and liters. Calibrated for 9 mixing ratios. All scales are read on the outside of the cup. Secure fitting snap-on lids are sold separately. Lids prevent accidental spill, solvent evaporation and debris from falling in the cup while between paint sessions.

Clear container makes it easy to insure accuracy measurements.
