# CARBON REDUCTION STATEMENT

Publication Date: 31<sup>st</sup> March 2024,

## Introduction

Inomed Health is committed to reducing our carbon footprint and achieving net zero by 2040, contributing to global efforts to mitigate climate change. This Carbon Reduction Plan outlines our strategies and specific actions for 2024 to reduce greenhouse gas emissions and promote sustainability.

At Inomed Health, we recognise our responsibility to contribute to a sustainable future while providing high-quality medical devices to the NHS. As a key player in the healthcare sector, we are committed to reducing our carbon footprint and promoting environmentally responsible practices throughout our operations.

We continue to report our progress to our stakeholders demonstrating transparency and accountability.

## Commitment to Carbon Reduction

Inomed Health is dedicated to minimizing our environmental impact through a comprehensive carbon reduction strategy. This includes:

1. **Sustainable Sourcing:** We prioritise suppliers who share our commitment to sustainability, ensuring that the materials used in our medical devices are sourced responsibly and have a lower environmental impact.
2. **Energy Efficiency:** We are investing in energy-efficient technologies and practices within our facilities to reduce energy consumption and greenhouse gas emissions.
3. **Logistics Optimisation:** We continually evaluate and improve our distribution methods to minimize carbon emissions associated with transportation. This includes optimizing delivery routes and considering eco-friendly transportation options.
4. **Waste Reduction:** We are implementing waste management strategies that focus on reducing, reusing, and recycling materials. Our goal is to minimise waste generated from both our operations and the lifecycle of our medical devices.
5. **Employee Engagement:** We believe that a sustainable future is built by a community. We actively engage our employees in sustainability initiatives, fostering a culture of environmental awareness and responsibility.
6. **Partnerships and Collaboration:** We seek partnerships with organizations and initiatives that promote carbon reduction and environmental sustainability within the healthcare sector.

## Monitoring and Reporting

We are committed to transparently monitoring our carbon footprint and reporting our progress regularly. This will help us set clear targets and hold ourselves accountable for achieving meaningful reductions in our emissions.

## Conclusion

At Inomed Health, we understand that our actions today will shape the health of our planet tomorrow. By integrating sustainability into our business practices, we aim to not only support the NHS but also contribute to a healthier, more sustainable world for future generations. Together, we can lead the way in reducing our carbon footprint and making a positive impact on the environment.
