

To whom it may concern:

Mr. Donald Azcona worked with Land Sea Power Ltd. for approximately five years.

During this period Don worked primarily as a Production Coordinator/Production Scheduler. Don was a conscientious, technically oriented individual who worked to solve production and customer issues efficiently. Don always worked in a detail oriented manner. During Don's last couple years his role transitioned from production support to an Industrial Sales position. Don continued to work to his detailed level of skill during this time.

Unfortunately due to a drop in business in 2009 Don was impacted by a downsizing of our sales group.

I would not hesitate to recommend Don for a position that requires a conscientious, detail oriented individual.

Barry Wright

Plant Manager  
Land Sea Power Ltd.
