Dear [Recipient's Name],

We would like to introduce you to [\*\*The Psychedelic-Assisted Therapy Act \(PAT-ACT\) of California\*\*](#) – a groundbreaking new law to decriminalize Psychedelic-Assisted Therapy in the State of California. A PDF of our proposal and time-line is attached.

As we navigate the complexities of modern life, the potential for psychedelic medicines to improve well-being is more critical than ever. The urgent need for innovative mental health solutions is clear, as traditional therapies are failing to adequately address conditions like PTSD, end-of-life anxiety, depression, and substance abuse disorders.

Psychedelic-Assisted Therapy is a transformative enhancement to mental health treatments which has demonstrated remarkable efficacy in clinical trials to significantly improve the lives of patients with these conditions!

But many individuals face legal repercussions for the use and possession of these medicines because these treatments remain illegal. Even so, [\*\*Psychedelic-Assisted Therapy is currently being practiced in California at considerable legal risk by hundreds of medical providers and thousands of their patients and clients!\*\*](#) It is also illegal to conduct clinical trials, research, and experimentation.

[\*\*The PAT-ACT will change all of this by removing criminal penalties in California for responsible clinical use and ethical research!\*\*](#)

By advocating for the decriminalization of Psychedelic-Assisted Therapy, we aim to not only broaden access to these potentially life-changing treatments, but also to shift public and regulatory perceptions about the value of these therapies.

This plan presents a significant opportunity to advance mental health treatment while addressing the shortcomings of previous legislative attempts.

During the last few years several bills to legalize psychedelics have failed in the legislature primarily due to a lack of polling and public support. In stark contrast, our proposal is grounded in a comprehensive poll conducted earlier this year which shows **OVERWHELMING SUPPORT FROM 71% TO 78% OF LIKELY VOTERS** for the changes which the PAT-ACT will make.

## **THIS IS WHY THE PAT-ACT A GUARANTEED WINNER!**

Here is what the PAT-ACT will do:

1. Permit privately funded research into the therapeutic and medical applications of psychedelic medicines – **at no cost whatsoever to the taxpayers or the state.**

2. Allow the use of psychedelic medicine **for medical and therapeutic purposes.**

3. Authorize **certified doctors and therapists to recommend** the use of psychedelic medicine for their patients and clients.

4. Allow patients and clients to possess psychedelic medicine **as specified in the recommendation** they have received from their doctor or therapist.

5. Permit patients and clients to consume psychedelic medicine **as recommended by their doctor or therapist.**

Our plan aims to raise awareness and advocate for policy changes which will decriminalize psychedelics, ensuring safe access to these powerful tools for healing. By shifting the narrative around psychedelics, we can cultivate a society which prioritizes health, wellness, and personal freedom.

We have already started the first phase of our plan by working with the Legislative Counsel of the state to draft the law. This is the official state agency which writes all the laws to be considered by the legislature.

Our second phase is to get the legislature to pass the bill next year, and get the Governor to sign it into law.

Should this not succeed, the third phase of our plan is to convert the bill into an initiative and place it on the next general ballot in November, 2026, for the voters to approve it and make it law.

Along the way our strategy includes getting the California Democratic Party (CDP) to officially endorse the law, and also working with county and city governments to adopt “Lowest Possible Priority” (LPP) ordinances to reduce the penalties for the possession and use of psychedelic medicines to the lowest priority for local law enforcement – about the same as a parking ticket.

We envision a future where individuals can explore the therapeutic benefits of psychedelics without fear of legal consequences, ultimately contributing to a healthier and more equitable society.

We invite you to join us in this vital endeavor!

**We are asking for your help in three critical areas:**

1. Please make a tax-deductible contribution to us for this effort.
2. Please officially endorse this project as an individual and/or organization.
3. Please share this proposal with others you know who can also help.

**Immediate funding is crucial to kick off our plan!**

As a 501c3 educational corporation, **all contributions to H.O.P.E. for these purposes are tax-deductible.**

With your support we believe we can bring about the policy changes needed to allow Psychedelic-Assisted Therapy to reach its full potential, providing hope and healing to those who need it most. A detailed proposal outlining our goals and strategic plan is attached to this email.

Your support can play a critical role in ensuring this transformative legislation moves forward. Together, we can secure a brighter future for those seeking innovative mental health treatments and **make a significant and positive change in the mental health care and therapeutic options available to millions of Californians!**

Thank you for considering this opportunity to support a revolutionary and transformative movement. We would be grateful for the opportunity to discuss how we can collaborate on this important initiative. So please feel free to contact us at your convenience.

Sincerely,

[Sender's Name], [Sender's Title]
