

Details and Specs

Height = 10" Diameter = 18' Flat table area = 34"
Four piece construction with interlocking design to hold seams in place.
Side pieces weigh approximately 180 lbs.
Middle sections weigh 275 lbs. & 320 lbs.
Short 1/2" turf gives the mound the feel of a clay mound.

Portolite builds the lightest, most durable pitching mounds on the market. Our pitching mounds give the pitcher the feel of a regulation baseball mound, while also allowing field crews the ability to move it with ease. Portolite pitching mounds are designed with a poly protected resilient core reinforced with a fiberglass base for a solid, no bounce, yet cushioned baseball mound that reduces knee and ankle strain. Portolite mounds are covered with the highest quality nylon AstroTurf® available in Clay or Green colors.
