## DIAMOND-DRY

Diamond-Dry is an all natural, biodegradable, and renewable product made from corn cobs with no chemicals, coloring, or other additives. Diamond Dry does an exceptional job of absorbing water on baseball/softball fields. Just apply to the wet areas and rake into the wet soil. Your field will be playable in minutes!

### WHY DIAMOND-DRY IS THE BEST CHOICE IN THE FIELD

- Spreads quickly and easily, drying out the field in minutes, without changing soil character
- Is safe, natural (cellulose fibers) with no residue build-up
- Can be applied to soggy grass and muddy areas
- Will not produce combustible fumes
- Less warehouse space, less bags to handle, less labor, less freight
- Saves money in eliminating the added expenses of rescheduled games
- Large inventory assures prompt delivering

### HOW TO USE DIAMOND-DRY

- Remove Excess Water
- Open Surface to air
- Apply Diamond-Dry spread with rake 1/2" to 1/4" thick
- Allow to stand several minutes
- Rake in
- Drag the driest area to the wettest
- Top dust the remaining damp spots
- Ready to play!

### WHY USE THE REAL DIAMOND-DRY

It is the proven quality athletic drying material used in the World Series and Super Bowl. The registered trademark of DIAMOND-DRY guarantees that only the highest grade corn cob flour is in the bag. WE WILL NOT COMPROMISE PROVEN QUALITY!!!
