

CROWDSTOPPER

GALVANIZED STEEL BARRICADES

- Security and Safety
- Traffic & Pedestrian Control
- Special Events
- Concerts

- Stadiums/Arenas/Convention Centers
- Fairs/Carnivals/Festivals
- Parades/Rallies

Keep crowds back and enhance security using CrowdStopper® long-lasting barricades.

Signature's CrowdStopper barricades are perfect for a variety of crowd control applications. Each maintenance free CrowdStopper is

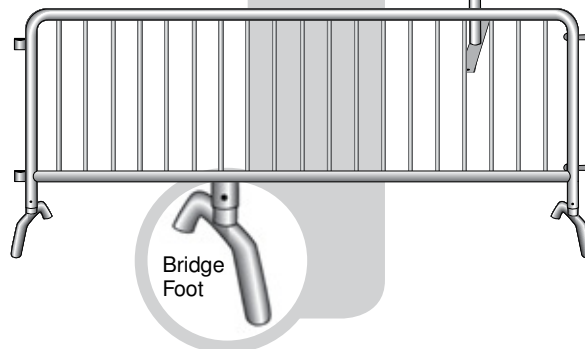

manufactured using 1-1/2" OD 16 gauge steel framing and is hot-dipped galvanized to prevent rust and corrosion for maintenance-free long life.

Each upright is made from 1/2" OD 16 gauge steel tubing and is fully welded to the frame for greater strength (1 1/4" OD 14 gauge frame tubing and 5/8" OD 18 gauge upright tubing is also available with minimum lead times). We offer multiple sizes, locking systems, and foot types to meet your various needs and can ship large quantities from stock.

Ideal for use on grass, soft or uneven surfaces. Offers superior resistance to pushing crowds.

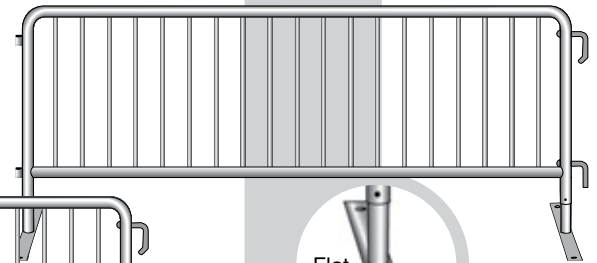

Size: 8'6" x 43"
Weight: 52 lbs.

Bridge Foot

CrowdStopper w/ Bridge Foot

Size: 8'6" x 43"
Weight: 57 lbs.

Flat Foot

CrowdStopper w/ Flat Foot

Ideal for creating parallel lines to funnel crowds or traffic.

CrowdStopper GS01 > Bridge Foot

The Signature Crowdstopper GS01, with a bridge-style foot, is our best-selling barricade. The bridge-foot design provides maximum stability for the barricade, thus making the GS01 an ideal choice for use on grass, soft or uneven surfaces. The Bridge Foot CrowdStopper provides the best resistance to pushing by crowds - so if you are planning a parade, rally or concert, choose the GS01 for your sensitive crowd control needs.

CrowdStopper GS02 > Flat Foot

The Signature Crowdstopper GS02, with the flat-style foot, is the ideal choice at special events or venues that require funnelling crowds or traffic in parallel lines. The flat-foot design minimizes the tripping hazard and vehicle tires roll easily over the foot without damage to the barricade. Additionally, GS02 is perfect for indoor use over sensitive floor surfaces as the flat foot distributes weight effectively and rubber grommets provide added protection. The GS02 has two holes in each foot which allow it to be anchored to the ground.
