Depicting a richly detailed Middle Eastern bazaar, the piece showcases advanced miniature techniques through its "forced perspective" stone archways, realistic aged textures, and a complex array of tiny handcrafted wares. Its impressive depth and cultural specificity make it a significant work of miniature folk art, capturing a timeless scene of Persian or Arabic commerce with museum-quality precision.

This three-dimensional paper diorama By Artist Natasha Beshenkovsky 2012, Captures a lively scene in New York's Central Park against the recognizable skyline of Midtown Manhattan. The artwork utilizes a variety of layered papercraft and cut-out techniques to bring depth to the urban landscape, where stylized, hand-painted figures engage in quintessential park activities such as rollerblading, skipping rope, and hula-hooping. By positioning these whimsical characters at different foreground levels and using a forced perspective for iconic buildings like the Sherry-Netherland and Hampshire House, the piece transforms a flat, "naïve" pop-art style into a tangible, miniature world that celebrates the energetic culture of New York City living. A Quote During An interview By Natasha Beshenkovsky " I would create small, cartoonish characters in different historical styles. I would make three dimensional images out of flat planes of wood. My most important work in this field was the Central Park panorama that included rollerbladers, families, strollers, trees, the landscape of New York, and more. Featured in Miniature Collector, it's four feet long and belongs now to Holly June Browne, who commissioned this work."

While the design was famously used for small, bronze-finished promotional still banks, this 30" x 31" version was designed for high-visibility branch decor, likely during the bank's mid-century expansion. The Art Deco relief depicts a family against a city skyline, framed by the bank's name and the Latin motto Terra - Economia - Labor (Earth, Economy, Labor), symbolizing the bank's commitment to Michigan's land and workforce. Because the bank was famously bailed out in 1972 and later absorbed by Comerica in 1983, large-scale artifacts like this plaque are rare survivors of a bygone era in Detroit banking.</p>

497	"Blue Noir on Plywood" Eric Buchmann - Click for Shipping Quote or Free Local Pick Up - Weight: 6 lb 4 oz, Size: 30" x 17" Eric Buchmann is a contemporary American artist whose work explores the intersection of urban grit and atmospheric portraiture. Known for his "posterized" style, Buchmann focuses on stripping his subjects down to their most essential forms of shadow and light, a technique he describes as "painting for the sake of painting." His process is deeply rooted in the materials he uses, often choosing unconventional foundations like reclaimed industrial wood to ground his subjects in a tangible, weathered reality. By breathing new life into these textures, Buchmann captures the duality of the modern experience—blending the raw anonymity of the city with a refined, expressive use of color. This evocative portrait on reclaimed wood serves as a masterful modern homage to the legendary "J Train Girl," capturing the haunting anonymity of a late-night New York City subway ride. By utilizing the rugged, industrial texture of the timber, the artist anchors a high-contrast silhouette where deep midnight shadows meet electric blues, creating a cinematic noir aesthetic that commands any room. More than a simple painting, this work is a soulful intersection of street-art heritage and contemporary fine art, making it an essential acquisition for a collector seeking a bold, conversational focal point with a true urban pulse.

600	Holly June Browne Collection Persian Diorama On Artisan Wrought Iron Stand with Art Sun Light - Click for Shipping Quote or Free Local Pick Up - Size: Wrought Iron stand 43" tall x 21" by Artist Peter O' Shaughnessy Rockbridge VA. & diorama under plexiglass 17.5" tall x 20.5" square with 19" diameter sun. The antique-style black wrought iron stand provides a dramatic, architectural foundation that elevates the bazaar scene to eye level, much like a traditional museum display. Its Solomonic or "barley twist" legs and curved, X-shaped stretcher—hallmarks of Spanish Baroque or Victorian furniture—add a sense of historic weight and European craftsmanship that contrasts with the Eastern theme above. This sturdy, handcrafted O' Shaughnessy ironwork acts as a pedestal for the Persian diorama, where a merchant passionately showcases vibrant miniature carpets to a wealthy couple under the warm, golden glow of the integrated hand made "sun" light. While other merchants on Zebras are entering the space. The juxtaposition of the dark, twisted iron and the brightly lit, delicate figures highlights the narrative of a luxury transaction, transforming the entire piece into a self-contained, illuminated story of global trade and opulence.
