1/4" Squares Please Draw with Dimensions as needed

**Technical Assistance:** Many cutting applications require more than a stock answer. Brazed-T-alloy / Brazed-Carbide / Insert / PCD, multiple wings, shear face, climb cutting, or the use of outboard fences and power feeds. We will assist you in meeting your profiling challenges. An infinite number of shapes and sizes will provide a solution to virtually any job. We invite your inquiries and stand ready to help you with your stock and custom cutter requirements.

**Unsurpassed Quality:** Our cutters are geometrically precise to the highest standards. We use the latest in 5 axis CNC equipment Coupled with high powered comparators, this equipment has proven to consistently meet our own strict tolerances in manufacturing.

**Fast Delivery:** Quick turnaround and delivery are essential. Fax or email your dimensional drawings to us and we will immediately process your order.

**Ease of Reordering:** Every custom-made cutter is given careful attention. Each is assigned its own drawing number which is filed for easy reordering reference. The assigned drawing number allows us to quickly duplicate the exact profile to your original specifications.
