QA Engineer with Adobe Commerce Cloud Expertise

Position Overview:

We are seeking a QA Engineer with experience in Magento and a deep understanding of the Adobe Commerce Cloud ecosystem. This role involves testing both the standard functionality of Magento and the additional tools included in Adobe Commerce Cloud, such as Adobe Sensei, Fastly, and more. The ideal candidate will have a strong background in Adobe Commerce Cloud, including its features and integrations, along with hands-on experience in both manual and automated testing techniques.

Location: Remote

Employment Type: Full-time

Key Responsibilities:

- Develop and execute test cases for solutions based on Adobe Commerce Cloud.
- Test integrations with tools like Adobe Sensei, Fastly, and other components of Adobe Commerce Cloud.
- Validate and test back-end functionality built on PHP, including functional and integration testing.
- Conduct API testing to ensure reliable system communication.
- Create bug reports and collaborate with the development team to resolve identified issues.
- Work within agile processes, participating in sprint planning and daily stand-ups.
- Maintain and improve automated test scripts and perform manual testing as needed.
- Use version control systems and task management tools such as Git, BitBucket, and Jira.

Required Skills & Qualifications:

- Experience in testing Magento with a strong understanding of Adobe Commerce Cloud functionality.
- Knowledge and practical experience with PHP.
- Skills in validating integrations with Adobe Sensei, Fastly, and other tools included in Adobe Commerce Cloud.
- Experience with API testing and tools like Postman or Swagger.
- Proficiency in using Git, BitBucket, Jira, and other tools to manage development processes.
- Familiarity with agile development methodologies.
- Proficiency in both manual and automated testing.

Working Hours Requirement:

- The team operates in the New York time zone, so we are looking for a candidate who is both able and willing to work within this time zone.

Preferred Skills:

- Experience with cloud infrastructure systems like WebScale.
- Understanding of CI/CD processes and the ability to configure them.
- Knowledge of automation testing tools such as Selenium or Cypress.

What We Offer:

- Work with one of the leading e-commerce platforms.
- Participation in large-scale projects using modern technologies.
- Opportunities for professional growth and development.
- Supportive team and a comfortable working environment.

If you are passionate about e-commerce, have a keen eye for detail, and excel in QA engineering, we'd love to hear from you! Send your CV and a brief cover letter to people@bravosouth.com with the subject line "QA Engineer – Adobe Commerce Cloud.
