

Community Business Incubator

A Place to Grow By the Sea

A Community Business Incubator

This is a space designed to bring together like minded small entrepreneurs.

It creates cost effective office and trading space for nano businesses and sole traders while providing mentoring and support from community experts and peers alike.

It draws on the Independent Culture of Burnham-on-Sea and helps support and grow ideas in a safe and sustainable environment.

A Place to Grow By the Sea

We see this as benefiting Burnham-on-Sea in a number of ways:

Independent Businesses - to provide a safe, sustainable support culture to accelerate and grow a wide range of local business ideas

Residents - to provide a wide range of services and products from a homegrown incubator, local businesses supporting and fulfilling local needs

High Street - to be able to provide a physical destination for Independent Business with kerb appeal

What types of businesses could it support?

It could include working space for multiple businesses, from trading spaces, to crafting stations to office space. It could be a flexible space depending on demand or business idea

I would like to see.....

More of....

Less of.....

Something different....
